SUPPLEMENTARY INFORMATION:

I. Additional Information About the Proposed Stipulated Partial Dismissal

On June 15, 2013, Plaintiffs filed suit in the federal district court for the District of Idaho against the Services. The original complaint alleged that the Services unreasonably delayed or unlawfully withheld completion of ESA consultation with EPA regarding new and revised water quality standards that were submitted in 1996 and/or 1997. On September 24, 2013, Plaintiffs filed an amended complaint adding various CWA and ESA claims against EPA regarding dozens of Idaho water quality standard submissions dating back to 1994. Broadly speaking, Plaintiffs' claims fell into two categories: claims that EPA failed to consult with the Services on various water quality standard approval actions and claims that EPA failed to complete its mandatory duties under the CWA with respect to various new and revised water quality standards adopted by the State. In April 2015, the Services entered a stipulated dismissal with Plaintiffs, by which they agreed to complete certain ESA obligations. This left EPA as the sole defendant in the case.

On February 28, 2019, the court partially granted EPA's motion to dismiss a number of claims on statute of limitations grounds, dismissing all ESA

failure-to-consult claims regarding EPA actions that predated September 24, 2007—6 years prior to filing the amended complaint. The court declined to dismiss any CWA mandatory duty claims, finding that the statute of limitations did not require dismissal because Plaintiffs had alleged an ongoing failure to act by EPA. This left seven discrete claims against EPA alleging a failure to undertake various duties pursuant to the ESA and CWA with regard to Idaho water quality standards.

The parties have negotiated a settlement framework in the form of a stipulated order of partial dismissal. The court would enter the order and retain jurisdiction to construe, carry out, enforce, modify, or resolve any dispute regarding the terms and conditions of the order. EPA and Plaintiffs negotiated a three-year timeline for EPA to complete an effects determination pursuant to 50 CFR 402.14(a) for its May 22, 2008 approval of Idaho's revisions to its salmonid spawning timing procedure and, as appropriate, to request initiation of any necessary ESA section 7 consultation with the Services. The State has been informed of the timeline and will be an applicant in any ESA consultation. The Order would also resolve Plaintiffs' claim for attorney's fees with an agreement to pay \$37,000.

For a period of thirty (30) days following the date of publication of this notice, the Agency will accept written comments relating to the obligations of EPA for resolution of the claims contained in the proposed stipulated order of partial dismissal from persons who are not named as original parties or intervenors to the litigation in question. EPA or the Department of Justice may withdraw or withhold consent to the proposed stipulated order of partial dismissal if the comments disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the CWA or ESA. Unless EPA or the Department of Justice determines that consent to this proposed stipulated order of partial dismissal should be withdrawn, the terms of the proposed stipulated order of partial dismissal will be affirmed and entered with the court.

SUPPLEMENTARY INFORMATION:

I. Background Information on the IRIS Handbook

The "ORD Staff Handbook for Developing IRIS Assessments," or "IRIS Handbook," provides operating procedures for developing assessments to the scientists in the IRIS Program. The IRIS Handbook implements recommendations and input from the National Academy of Sciences, Engineering and Medicine (NASEM), EPA Agency reviewers, other Federal Agencies, EPA's Science Advisory Board, and workshops involving input from experts in systematic review. The steps in the overall IRIS process have not changed (<https://www.epa.gov/iris/basic-information-about-integrated-risk-information-system#process>). The IRIS Handbook is designed so that it can be updated, as needed, to allow for

incorporation of method refinements, advances in assessment science, and any updates in EPA guidance (see <https://yosemite.epa.gov/sab/sabproduct.nsf/02ad90b136fc21ef85256eba00436459/df0f42c34645448685258570005adfff!OpenDocument&TableRow=2.3#2>).
