Abstract: Owners and operators of affected onshore natural gas processing plants are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 60, subpart A), as well as for the specific requirements at 40 CFR part 60, subparts KKK and LLL. Owners or operators of the affected facilities must submit a one-time-only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with these same standards.

Form Numbers: None.

Respondents/affected entities: Owners and operators of onshore natural gas processing plants that that commenced construction, reconstruction, or modification after January 20, 1984, and on or before August 23, 2011.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart KKK and 40 CFR part 60, subpart LLL).

Estimated number of respondents: 362 (total).

Frequency of response: Semiannually.

Total estimated burden: 67,500 hours per year. Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: Total labor costs are \$7,990,000 (per year), which includes \$68,400 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred because the number of respondents subject to these requirements has decreased as those respondents modify their sources and become subject to another NSPS standard. As sources subject to NSPS Subparts KKK and LLL modify, they become subject to NSPS Subpart OOOOa and cease being subject to NSPS Subparts KKK and LLL. There is also a decrease in the estimated number of respondents subject to NSPS Subpart LLL. This is due to a re-examination of the Agency's ECHO database of sources subject to Subpart LLL with a NAICS code of 211130

(natural gas extraction) and reporting SO₂ emissions.

FEDERAL RESERVE SYSTEM

Privacy Act of 1974; System of Records

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice of a modified system of records.

SUMMARY: Pursuant to the provisions of the Privacy Act of 1974, notice is given that the Board of Governors of the Federal Reserve System (Board) proposes to modify an existing system of records, entitled BGFRS-33, "FRB—Telephone Call Detail Records" to reflect changes in the format, location, and source of its wireless phone records. The Board also proposes to rename the system of records BGFRS-33, "FRB—Wired and Wireless Telephone Records," as it stores information on the use of Board telephones, both wired and wireless.

DATES: Comments must be received on or before December 31, 2020. This modified system of records will become effective December 31, 2020, without further notice, unless comments dictate otherwise.

The Office of Management and Budget (OMB), which has oversight responsibility under the Privacy Act, requires a 30-day period prior to publication in the **Federal Register** in which to review the system and to provide any comments to the agency. The public is then given a 30-day period in which to comment, in accordance with 5 U.S.C. 552a(e)(4) and (11).

ADDRESSES: You may submit comments, identified by *BGFRS-33: "FRB—Wired and Wireless Telephone Records"*, by any of the following methods:

- **Agency Website:** <https://www.federalreserve.gov>. Follow the instructions for submitting comments at <https://www.federalreserve.gov/apps/foia/proposedregs.aspx>.

FOR FURTHER INFORMATION CONTACT: David B. Husband, Counsel, (202) 530-6270, or david.b.husband@frb.gov; Legal Division, Board of Governors of the Federal Reserve System, 20th Street and

Constitution Avenue NW, Washington DC 20551.

SUPPLEMENTARY INFORMATION: The Board is modifying this system of records to reflect changes in the format, location, and source of its wireless phone records. The Board previously received wireless phone records from the vendors in paper copy and, after reviewing the records, transferred them to off-site storage. The Board now receives wireless phone records electronically, from both vendors and, in some cases, the devices themselves, and retains the electronic copy. Accordingly, the Board is amending the system name to reflect that the scope of the records stored in this system includes both wired and wireless phone records. The Board is also updating the system managers, adding context on the use of the records, and delineating that both wired and wireless phone records are included in the records.

To reflect these changes, the Board has updated the sections on system location, system manager, and the purposes of the system. The Board has also updated the categories of individuals covered by the system, the categories of records in the system, the record source categories, the policies and practices for retrieval, and the administrative, physical, and technical safeguards sections. Finally, the Board has updated the routine uses section to include a link to the Board's general routine uses. The Board is not amending or establishing any routine uses.

The Board is also making technical changes to BGFRS-33 consistent with the template laid out in OMB Circular No. A-108. Accordingly, the Board has made technical corrections and non-substantive language revisions to the following sections: "Policies and Practices for Storage of Records," "Policies and Practices for Retrieval of Records," "Policies and Practices for Retention and Disposal of Records," "Administrative, Technical and Physical Safeguards," "Record Access Procedures," "Contesting Record Procedures," and "Notification Procedures." Periodic assessments and reviews are conducted to determine whether users still require access, have the appropriate role, and whether there have been any unauthorized changes. These system

controls assist in preventing and detecting security violations and performance or other issues in accordance with NIST and Board standards which, in turn, are based on applicable laws and regulations.
