SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a renewal of a currently approved information collection.

This information collection is needed in order to meet the monitoring requirements of the Magnuson-Stevens Act (MSA). An Individual Fishing Quota (IFQ) Program for the West Coast groundfish trawl fishery was implemented in January 2011 by the Pacific Fisheries Management Council. This mandatory data collection program will continue to collect economic cost earnings data from all harvesters and processors participating in the West Coast groundfish trawl fishery.

Data will be collected from all catcher vessels registered to a limited entry trawl endorsed permit, quota share permit owners, catcher processors registered to catcher processor permits, and motherships registered to mothership permits, first receivers, and shore-based processors that received round or head-and-gutted IFQ groundfish or whiting from a first receiver to provide the necessary information for analyzing the effects of the West Coast Groundfish Trawl Catch Share Program. As stated in 50 CFR 660.114, the Economic Data Collection (EDC) forms due on September 1, 2020, will provide data for the 2019 operating year. Northwest Fishery Science Center (NWFSC) economists will use these data to examine how the implementation of

catch share management affects fleet structure, production costs, employment, generation and distribution of economic rent, and regional economic impacts. Analysis based on this data will not only be used for providing information to the Pacific Fisheries Management Council on changes to the catch share program, but also to meet monitoring requirements for catch share programs in the Magnuson-Stevens Act.

II. Method of Collection

Vessel, first receiver and shore-based processor forms may be submitted via mail or electronically. All quota share owner survey forms must be submitted online as part of the quota share permit renewal system.
