

entire annual sample and is representative of the sampling frame. The Census Bureau proposes to use two randomly selected methods panel groups for each treatment. Hence, each treatment will have a sample size of approximately 24,000 addresses. In total, approximately 96,000 addresses will be used for the four experimental treatments and 24,000 for the control. The remaining ACS sample will receive production materials.

The Census Bureau proposes to evaluate the experimental treatments by comparing self-response rates overall and by mode. For each comparison, a two-tailed t-test will be used to measure the impact on the evaluation measure in either direction with 80 percent power at the $\alpha = 0.1$ level. The sample size will be able to detect differences of approximately 1.74 percentage points between the self-response return rates between two experimental treatments. To assess the costs of implementing any of the experimental treatments, we will also conduct a cost analysis.

The Regional Office internet Letter Test is designed to test content changes to a letter used to encourage online self-response during CAPI. This letter is sent as a pressure-seal mailer from the Census Bureau's National Processing Center to all mailable sampled addresses in the CAPI universe.

The changes to the pressure seal letter proposed for this test are (1) the message on the outside of the pressure seal mailer (options include either a "Past Due" message or "Required by Law") and (2) whether to include information about TQA as a response option, or only mention the internet. The experimental design isolates each of the content factors being studied. There is one control, which uses production materials, and three experimental treatments.

To field this test, the Census Bureau plans to use the ACS production sample (clearance number: 0607-0810). There is no increase in burden from this test because each treatment will include the same number of mailings and result in the same burden estimate per interview (40 minutes). The Census Bureau proposes that this test be conducted in the summer of 2021 (pending operational constraints) and adhere to the same data collection protocols as production ACS.

The Census Bureau proposes to use six randomly selected methods panel groups for each treatment. Each treatment will have a sample size of approximately 15,600 addresses. In total, approximately 46,800 addresses will be used for the three experimental treatments and 15,600 for the control.

All mailable CAPI cases are included in the experiment.

The Census Bureau proposes to evaluate the experimental treatments by comparing self-response rates during CAPI and overall CAPI response rates, as well as refusal rates and other interview outcomes. The TQA call volume will also be monitored. For each comparison, a two-tailed test will be used so that the Census Bureau can measure the impact on the evaluation measure in either direction with 80 percent power at the $\alpha = 0.1$ level. The sample size will be able to detect differences of approximately 1.74 percentage points between the self-response return rates between two experimental treatments. A cost analysis will also be conducted.

Affected Public: Individuals or households.

Frequency: One-time tests as part of the monthly American Community Survey.

Respondent's Obligation: Mandatory.

Legal Authority: Title 13, United States Code, Sections 141, 193, and 221.

Circular Welded Non-Alloy Steel Pipe From the Republic of Korea: Final Results of Antidumping Duty Administrative Review; 2017-2018; Correction

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

ACTION: Notice; correction.

SUMMARY: The International Trade Administration published a document in the **Federal Register** of November 6, 2020, concerning the final results of the administrative review of circular welded non-alloy steel pipe (CWP) from the Republic of Korea (Korea) for the period of review of November 1, 2017 through October 31, 2018. The document contained an incorrect spelling.

FOR FURTHER INFORMATION CONTACT: Andre Gziryan, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-2201.

SUPPLEMENTARY INFORMATION:

Correction

In the **Federal Register** of November 6, 2020, in FR Doc 2020-24722, on page 71057, in the second column, correct Appendix II (List of Companies Not Individually Examined), number 22, to read "Ycp Co."¹

This correction to the *Final Results* is published in accordance with sections 751(a)(1) and 777(i)(1) of the Tariff Act of 1930, as amended.

Dated: November 19, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.
