

the primary Federal law governing the protection of animal health. The Law gives the Secretary of Agriculture broad authority to detect, control, or eradicate pests or diseases of livestock or poultry. The AHPA is contained in Title X, Subtitle E, Sections 10401–18 of Public Law 107–171, dated May 13, 2002, the Farm Security and Rural Investment Act of 2002. Disease prevention is the most effective method to maintain a healthy animal population and for enhancing the United States' ability to compete in the world market of animal and animal product trade. The Animal and Plant Health Inspection Service (APHIS) regulates the importation of animals and animal products into the United States to guard against the introduction of animal diseases not present or prevalent here.

Need and Use of the Information: APHIS will collect information using an Application for Import or in Transit Permit, concerning the origin and history of the items destined for importation into the United States. APHIS will also collect information to ensure that swine, pork and pork products, and swine semen pose a negligible risk of introducing exotic swine diseases into the United States. A Declaration of Importation form is also used to collection information in this collection. Collecting this information less frequently or failing to collect it would increase the chances of CSF and other swine diseases being introduced into the United States.

Description of Respondents: Foreign Federal Governments and Businesses.

Number of Respondents: 194.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 1,600.

SUPPLEMENTARY INFORMATION:

Title: Storage and Use of Explosives and Magazine Security on National Forest System Lands Under a Special Use Authorization.

OMB Number: 0596-NEW.

Type of Request: New.

Abstract: Existing directives in the Forest Service Manual and Handbook are being revised to improve security and administration of explosive magazines and explosives use that are authorized under a special use authorization. The revisions clarify that all non-Forest Service storage and use of explosives, including use and storage of military weapons and ammunition for purposes of avalanche mitigation on National Forest System lands, must be authorized by a special use authorization that contains clause B-29 in Forest Service Handbook 2709.11, Chapter 50, section 52.2, on storage and

use of explosives and magazine security. Clause B-29 requires authorization holders to comply with applicable United States Department of Justice, Bureau of Alcohol, Tobacco, Firearms and Explosives, state, or Department of the Army requirements and applicable Forest Service requirements.

To allow the Forest Service to monitor holder compliance with clause B-29, the revised directives require holders of an authorization containing the clause to submit certain documentation annually as part of their operating plan. The required documentation includes copies of a log containing the date and type of magazine inspections (including inspections required every seven days) and the date all deficiencies identified in any magazine inspection report were corrected; copies of any magazine inspection reports; a copy of the holder's current ATF-issued federal explosives license or federal explosives permit, if applicable; and a copy of a log containing the date of the most recent magazine lock and key replacement.

Estimate of Annual Burden: 10 minutes.

Type of Respondents: Holders of a special use authorization authorizing the storage and use of explosives.

Estimated Annual Number of Respondents: 60.

Estimated Annual Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 10 hours.

Comment is invited on (1) whether this collection of information is necessary for the stated purposes and the proper performance of the functions of the Agency, including whether the information will have practical or scientific utility; (2) the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the
