POLICY JUSTIFICATION

Taipei Economic and Cultural Representative Office in the United States (TECRO)—Field Information Communications System (FICS)

TECRO has requested to buy a Field Information Communications System (FICS), consisting of one hundred fifty-four (154) Communications Nodes (CN) with S-788 Type III shelter; twenty-four (24) Communication Relays with S-788 Type III shelter; eight (8) Network Management Systems (NMS) with S-788 Type III shelter; Basic Issue Items (BII); program management support; verification testing; system technical support; transportation; spare and repair parts; communication support equipment; communication equipment integration; tools and test equipment; personnel training and training equipment; initial repair and return program; Additional Authorized List (AAL); technical manuals; Quality Assurance Team (QAT); U.S. Government and contractor engineering; technical and logistics support services; contractor provided training; Field Service Representatives (FSR); and other related elements of logistics and program support. The total estimated program cost is \$280 million.

This proposed sale is consistent with U.S. law and policy as expressed in Public Law 96-8.

This proposed sale serves U.S. national, economic, and security

interests by supporting the recipient's continuing efforts to modernize its armed forces and to maintain a credible defensive capability. The proposed sale will help improve the security of the recipient and assist in maintaining political stability, military balance, economic and progress in the region.

This proposed sale is designed to provide mobile and secure communications. It will contribute to the recipient's goal to modernize its military communication's capability in support of their mission and operational needs. The recipient will have no difficulty absorbing these systems into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor is currently unknown due to a pending open competition for selection. The purchaser typically requests offsets. Any offset agreement will be defined in negotiations between the purchaser and the contractor(s).

Implementation of this proposed sale will not require the permanent assignment of any additional U.S. Government or contractor representatives to the recipient. Contractor representative and U.S. Government support teams may be required to travel to the country on a temporary basis.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 20-87

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The Field Information Communications System (FICS) is made up of commercially available, non-program of record components. The FICS system (also referred to as "Syun Lien") is an area-switched communications system which is designed to provide mobile and secure communications in a wide range of battle situations. The FICS system provides mobile and secure voice and data communications on an automatic, discrete addressed, fixed-directory basis to the military Tactical Operations Center (TOC)-level command posts (CPs), and remote (mobile) users employing technological improvements in radio transmissions, data networking and packetized voice, while minimizing system footprint (power, size, personnel and logistics train). The system supports

both mobile and wire subscribers with a means to exchange command, control, communications, and intelligence information in a dynamic tactical environment.

2. The highest level of classification of defense articles, components, and services included in this potential sale is UNCLASSIFIED.

3. If a technologically advanced adversary were to obtain knowledge of the hardware and software elements, the information could be used to develop countermeasures or equivalent systems, which might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the recipient can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the recipient.

POLICY JUSTIFICATION

Romania—F-16 Modernization and Logistics Support

The Government of Romania has requested to buy upgrades to the avionics, software, communication equipment, navigational aids, and cockpit of its Mid-Life Update (MLU) Block 15 F-16 aircraft fleet along with additional logistics support. Included in the aircraft modernization are eight (8) LN-260 Global Positioning System (GPS) and nineteen (19) Multifunctional Information Distribution System Joint Tactical Radio Systems (MIDS JTRS). Also included is AN/APX-126 Advanced Identification Friend or Foe (IFF); ARC-210 Radios; KIV-78 Cryptographic Appliques; other secure communications, navigation, and encryption devices; Joint Mission Planning System (JMPS) software; aircraft minor modification, integration and test support, support equipment, software and software support; personnel training; spare and repair parts; publications and technical documentation; U.S. Government and contractor engineering, technical and logistical support services; and other related elements of logistical and program support. The estimated total cost is \$175.4 million.

This proposed sale will support the foreign policy goals and national security of the United States by helping to improve the security of a NATO ally in developing and maintaining a strong

and ready self-defense capability. This proposed sale will enhance U.S. national security objectives in the region.

The proposed sale will improve Romania's capability to meet current and future threats by upgrading its avionics to meet interoperability requirements for encrypted communications systems used by NATO forces. This increased secure communications capability will assist Romania in the defense of its homeland and U.S. personnel stationed there. Romania has demonstrated a significant financial commitment to modernizing its military, which will further enhance its interoperability with NATO. Romania will have no difficulty absorbing these capabilities into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin Aeronautics Company of Fort Worth, TX. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of U.S. Government or contractor representatives in Romania.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Annex

Item No. vii

(vii) *Sensitivity of Technology*:

1. The embedded GPS-INS (EGI) LN-260 is a sensor that combines GPS and inertial sensor inputs to provide accurate location information for navigating and targeting.

2. The Multifunctional Information Distribution System with Joint Tactical Radio System (MIDS JTRS) is an advanced Link-16 command, control, communications, and intelligence (C3I) system incorporating high-capacity, jam-resistant, digital communications links for exchange of near real-time tactical information, including both data and voice, among air, ground and sea elements.

3. The AN/APX-126 Advanced Identification Friend or Foe (IFF) Combined Interrogator Transponder (CIT) is a system capable of transmitting and interrogating Mode 5.

4. The ARC-210 UHF/VHF secure radio with HAVE QUICK II is a voice communications radio system that can

operate in either normal, secure, and/or jam-resistant modes.

5. The KIV-78 is a crypto applique for IFF. It can be loaded with Mode 5 classified elements.

6. The Joint Mission Planning System (JMPS) is a multi-platform PC based mission planning system.

7. The highest level of classification of information included in this potential sale is SECRET.

8. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

9. A determination has been made that Romania can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

10. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Romania.
