#### **Schedule for the Decision-Making Process**

The BLM anticipates a decision in February 2022; the Forest Service anticipates a decision on support facilities and the special use authorizations in February 2022; the U.S. Army Corps of Engineers anticipates a 404 permit decision in February 2022. Idaho Department of Environmental Quality anticipates a Point of Compliance in December 2021 and Idaho Department of Land anticipates a reclamation plan approval in 2022.

#### **Public Scoping Process**

This notice of intent initiates the scoping process, which guides the development of the Environmental Impact Statement. Scoping meetings will be virtual. An announcement about when and how to access the virtual meetings online will be posted on the BLM's project website.

The purpose of public scoping is to identify relevant issues that will influence the scope of the environmental analysis, including alternatives, and guide the process for developing the environmental impact statement. The BLM and Forest Service will use and coordinate the NEPA public scoping to help fulfill the public

involvement requirements under the National Historic Preservation Act (54 U.S.C. 306108) as provided in 36 CFR 800.2(d)(3). The information about historic and cultural resources within the area potentially affected by the proposed action will assist the BLM and Forest Service in identifying and evaluating impacts to such resources.

The BLM and Forest Service will conduct government-to-government consultation with Indian tribes in accordance with Executive Order 13175 and other policies. Agencies will give due consideration to Tribal concerns, including impacts on Indian trust assets and treaty rights and potential impacts to cultural resources.

The lead agencies invite Federal, State, and local agencies, along with Tribes and other stakeholders that may be interested in or affected by the proposed Husky 1 North Dry Ridge Mine to participate in scoping. Agencies with regulatory authority or special expertise, if eligible, may request or be requested by the BLM and Forest Service to participate in the development of the environmental analysis as a cooperating agency.

#### **Request for Identification of Potential Alternatives, Information, and Analyses Relevant to the Proposed Action**

BLM and Forest Service request assistance with identifying potential alternatives to the Proposed Action to be considered. As alternatives should resolve a problem with the Proposed Action, please indicate the purpose of the suggested alternative. The BLM and Forest Service also request that potential impacts that should be analyzed be identified. Impacts should be a result of the action; therefore, please identify the activity and the potential impact that should be analyzed. Information that reviewers have that would assist in the development of alternatives or analysis of resources issues is also helpful.

#### **Lead and Cooperating Agencies**

The BLM and Forest Service are joint lead agencies. U.S. Army Corps of Engineers, Idaho Department of Environmental Quality and Idaho Governor's Office of Energy and Minerals are cooperating agencies.

#### **Decision Makers**

Idaho Falls District Manager Mary D'Aversa is the BLM responsible official. Caribou-Targhee Forest Supervisor Mel Bolling is the Forest Service responsible official.

#### **Nature of Decisions to Be Made**

The BLM will decide, regarding approval of the MRP and appropriate mitigation measures, the proposed Federal Phosphate Lease modifications, and other appropriate land use authorizations for activities that take place on leased lands.

The Forest Service will decide on (1) recommendations to the BLM concerning surface management and mitigation on leased lands within the Caribou National Forest; (2) decisions on mine-related activities that occur off-lease on NFS lands (Special Use Authorization), and (3) whether to approve project-specific amendment(s) to the Forest Plan.

The USACE will decide whether to issue permit(s) under Section 404 of the Clean Water Act for placement of fill or dredge material into waters of the U.S. based on their determination of compliance with the EPA's 404(b)(1) Guidelines (40 CFR 230) including selection of the least environmentally damaging practicable alternative and the public interest review finding at 33 CFR 320.4(a).

#### **Public Disclosure**

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.
