

- Hawaii County, HI (DR 4366, an additional \$23,720,000). *Extraordinary circumstance:* At the time of the December 2019 allocation FEMA Public Assistance (PA) estimates were still being discussed with state officials. The PA estimate at the time of the 2019 allocation was just \$1.5 million with local match (“unmet need”) of \$378,000. The updated data from FEMA is that DR 4366 has \$96 million in Category C to G needs with a \$24 million match requirement which substantially increases unmet needs.

- Northern Marianas (DR 4396 and DR 4404, an additional \$10,378,000). *Extraordinary circumstance:* FEMA’s Permanent Housing Construction (PHC) program is seldom activated by FEMA so it requires a special consideration for HUD’s calculation of unmet needs. In HUD’s December 3rd allocation announcement we had reduced the housing needs estimate for the Northern Marianas based on a FEMA early estimate that 455 homes would be repaired or replaced by the PHC program and thus would not need CDBG–DR assistance. At the time, the program was in its early implementation and the number of homes served was expected to change. Due to the unusual nature of this FEMA program, HUD requested from FEMA in May 2020 a revised estimate of how many homes would be served. That revised FEMA PHC estimate is that 300 homes are now expected to be served by PHC instead of the previously estimated 455 homes. This reduction in the FEMA PHC leads to an increase in the Northern Marianas unmet CDBG–DR need estimate by 155 homes.

- Texas (DR 4466, an additional \$14,769,000). *Extraordinary circumstance:* This disaster was declared on October 4th and the data used for the December 3rd allocation had been extracted from FEMA’s systems on November 15, 2019. In general, HUD’s experience is that FEMA data is most complete for the purpose of calculating CDBG–DR unmet needs approximately 90 days after a disaster declaration. DR 4466 was the only disaster in 2019 that had been declared within 90 days of the November 15th data extraction. For this reason, HUD requested a refresh of the FEMA data for DR 4466 which identified 252 additional homes with serious damage than had been identified in the prior allocation leading to the increased estimate of need.

- Puerto Rico (DR 4473, \$36,424,000). *Extraordinary circumstance:* On December 28, 2019, Puerto Rico experienced a major disaster (DR 4473) that has continued for some months with continuing after-shocks. This is a disaster occurring in both 2019 and 2020. Because it initially occurred in 2019 it is eligible for funding from Public Law 116–20. However, this disaster is on-going. FEMA had closed the application period for the IHP program but due to a serious after-shock on May 2, 2020, FEMA reopened the application period for this disaster. This allocation is based on the data before FEMA reopened the application period.
