

information. This information is transmitted to CBP in advance via the ACE's Export Information System.

Manifest Confidentiality: An importer or consignee (inward) or a shipper (outward) may request confidential treatment of its name and address contained in manifests by following the procedure set forth in 19 CFR 103.31.

Vessel Stow Plan: For all vessels transporting goods to the US, except for any vessel exclusively carrying bulk cargo, the incoming carrier is required to electronically submit a vessel stow plan no later than 48 hours after the vessel departs from the last foreign port that includes information about the vessel and cargo. For voyages less than 48 hours in duration, CBP must receive the vessel stow plan prior to arrival at the first port in the United States. The vessel stow plan is provided for by 19 CFR 4.7c.

Container Status Messages (CSMs): For all containers destined to arrive within the limits of a U.S. port from a foreign port by vessel, the incoming carrier must submit messages regarding the status of events if the carrier creates or collects a container status message (CSM) in its equipment tracking system reporting that event. CSMs must be transmitted to CBP via a CBP-approved electronic data interchange system. These messages transmit information regarding events such as the status of a container (full or empty); booking a container destined to arrive in the United States; loading or unloading a container from a vessel; and a container arriving or departing the United States. CSMs are provided for by 19 CFR 4.7d.

Importer Security Filing (ISF): For most cargo arriving in the United States by vessel, the importer, or its authorized agent, must submit the data elements listed in 19 CFR 149.3 via a CBP-approved electronic interchange system within prescribed time frames outlined in 19 CFR 149.2. Transmission of these data elements provide CBP with advance information about the shipment.

SUPPLEMENTARY INFORMATION:

I. Background

This modified system of records notice is being published because the Federal Emergency Management Agency (FEMA) collects, maintains, uses, retrieves, and disseminates personally identifiable information of public officials, certifiers, applicants, and homeowners who are involved in the Hazard Mitigation and Flood Mapping Process. FEMA administers the National Flood Insurance Program (NFIP) and Hazard Mitigation Planning programs. The Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended by the Disaster Mitigation Act of 2000, provides the legal basis for FEMA and other government agencies to undertake a risk-based approach to reducing losses from natural hazards through mitigation planning. The Federal Insurance Mitigation Administration's (FIMA) Mitigation Planning Program oversees and provides guidance to state, local, tribal, and territorial (SLTT) governments that are required to develop a FEMA-approved

risk-based hazard mitigation plan. This plan is a precondition for receiving non-emergency disaster assistance from the federal government, including funding for flood hazard mitigation projects. FEMA collaborates with SLTT mitigation planners and risk analysts to support the development, review, and approval of SLTT hazard mitigation plans, tracks planned mitigation actions, and facilitates collaboration among planners and risk analysts.

The National Flood Insurance Act of 1968 (NFIA) (42 U.S.C. 4001 *et seq.*), and as further amended by the Biggert Waters Flood Insurance Reform Act of 2012, Public Law 112-141, establishes that FEMA will provide flood insurance in communities that participate in the NFIP by adopting and enforcing floodplain management ordinances that meet the minimum NFIP requirements. The law requires FEMA to provide, maintain, and make public flood hazard information and maps to support floodplain management and insurance activities. FEMA's regulations implementing NFIA, including the flood mapping program, may be found in 44 CFR 59-72.

The NFIA requires insurance companies that write flood insurance policies on behalf of the NFIP to use FEMA flood maps to determine insurance rates. These flood maps consist of zones or areas. Flood hazard areas identified on FEMA flood maps are identified as a Special Flood Hazard Area (SFHA). SFHA is defined as the area that will be inundated by a flood event having a 1-percent chance of being equaled or exceeded in any given year. The 1-percent-annual-chance flood is also referred to as the base flood or 100-year flood. SFHAs are labeled as Zone A, Zone AO, Zone AH, Zones A1-A30, Zone AE, Zone A99, Zone AR, Zone AR/AE, Zone AR/AO, Zone AR/A1-A30, Zone AR/A, Zone V, Zone VE, and Zones V1-V30. Moderate flood hazard areas, labeled Zone B or Zone X (shaded) are also shown on the maps, and are the areas between the limits of the base flood and the 0.2-percent annual-chance (or 500-year) flood. The areas of minimal flood hazard, which are the areas outside the SFHA and higher than the elevation of the 0.2-percent-annual-chance flood, are labeled Zone C or Zone X (unshaded).

Members of the public view and review these FEMA maps and related products online free of charge to understand a property's flood risk. Other related information may also be shown on different layers that can be seen on FEMA's National Flood Hazard Layer available at msc.fema.gov. In addition, community officials must use
