SUPPLEMENTARY INFORMATION:

Background

On December 11, 2020, we published a proposed rule to designate and authorize the release of a NEP of CV spring-run Chinook salmon under the ESA in the upper Yuba River and its tributaries upstream of Englebright Dam, California, and establish take exceptions for the NEP for particular activities. In that notice we also announced a 30-day public comment period and the availability of a draft EA.

We received a request to extend the public comment period by 90 days in order to provide the public with additional time to adequately comment on the proposed rule. We considered the request and concluded that a 60-day extension should allow sufficient time for responders to submit comments without significantly delaying finalization of the proposed rule. We are therefore extending the close of the public comment period from January 11, 2021, to March 12, 2021. In addition to extending the public comment period,

we have also updated contact information and our website address to review the proposed rule and supporting materials.

Authority

The authority for this action is the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Dated: January 5, 2021.

Endangered and Threatened Wildlife and Plants; Regulations for Interagency Cooperation

AGENCY: U.S. Fish and Wildlife Service, Interior; National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Commerce.

ACTION: Proposed rule.

SUMMARY: The U.S. Fish and Wildlife Service (FWS) and the National Marine Fisheries Service (NMFS) (collectively referred to as the “Services” or “we”) propose to amend the Services’ consultation regulations under the Endangered Species Act of 1973, as amended, pertaining to the U.S. Forest Service and Bureau of Land Management. The proposed revisions would clarify that reinitiation of consultation would not be required for these agencies’ previously approved land management plans when new information reveals that effects of a plan may affect listed species or critical habitat in a manner or to an extent not previously considered, provided that any authorized actions for which the new information is relevant will be addressed through a separate action-specific consultation. The proposed revisions would also replace the existing regulation’s temporary

instructions concerning National Forest System lands with permanent instructions. The Services are proposing this change to improve and clarify the interagency cooperation procedures by making them more efficient and consistent.

DATES: We will accept comments from all interested parties until February 11, 2021. Please note that if you are using the Federal eRulemaking Portal (see **ADDRESSES** below), the deadline for submitting an electronic comment is 11:59 p.m. Eastern Standard Time on this date.

SUPPLEMENTARY INFORMATION:

Background

The purposes of the Endangered Species Act of 1973, as amended (“ESA” or “Act”; 16 U.S.C. 1531 *et seq.*), are to provide a means to conserve the ecosystems upon which listed species depend, to develop a program for the conservation of listed species, and to achieve the purposes of certain treaties and conventions. Moreover, the

Act states that it is the policy of Congress that the Federal Government shall seek to conserve threatened and endangered species and use its authorities in furtherance of the purposes of the Act. The Lists of Endangered and Threatened Wildlife and Endangered and Threatened Plants (hereafter, “the Lists”) are in title 50 of the Code of Federal Regulations in part 17 (§ 17.11(h) and § 17.12(h)).

Part 402 of title 50 of the Code of Federal Regulations establishes the procedural regulations governing interagency cooperation under section 7 of the Act, which requires Federal agencies, in consultation with and with the assistance of the Secretaries of the Interior and Commerce, to insure that any action authorized, funded, or carried out by such agencies is not likely to jeopardize the continued existence of endangered or threatened species or result in the destruction or adverse modification of critical habitat of such species. The Secretary of the Interior and the Secretary of Agriculture, through the Bureau of Land Management (BLM) and the U.S. Forest Service (FS), respectively, are responsible for the administration, management, and protection of approximately 438 million surface acres of Federal lands. Congress has directed that both Departments develop land management plans that provide for management of these Federal lands in accordance with the concepts of multiple use and sustained yield.

More specifically, the Federal Land Policy and Management Act of 1976 (FLPMA) and the National Forest Management Act (NFMA) require the Secretaries of the Interior and Agriculture, respectively, to “develop, maintain, and, as appropriate, revise” land management plans and to coordinate such planning with other Federal agencies. *See* 43 U.S.C. 1712(a), (c)(1)–(c)(9); 16 U.S.C. 1604(a); *see also Norton v. Southern Utah Wilderness Alliance*, 542 U.S. 55 (2004) (*SUWA*); *Ohio Forestry Ass’n v. Sierra Club*, 523 U.S. 726, 728 (1998) (*Ohio Forestry*). The BLM and FS develop plans that provide standards and guidelines for land and resource management that reflect both economic and environmental considerations. Once a plan is adopted, the agencies’ individual project decisions and associated permits, contracts, and other instruments regulating use and occupancy within a unit covered by the plan must be consistent with the plan. *See* 43 U.S.C. 1732(a); 16 U.S.C. 1604(i); 43 CFR 1601.0–5, 1610.5–3(a); 36 CFR 219.15.
