retention of information across Government when there is cooperation and timely sharing of relevant information among complementary missions both between and within departments and agencies.

I. A risk-based approach is used to identify and detect potential vulnerabilities and threats early in the process and undertake risk mitigation throughout the process to lessen or prevent the impact to people, property, information, and mission.

#### IX. Information Technology

Successfully vetting a trusted workforce and protecting personal data requires effective, secure, and innovative technology and the ability to integrate newer and better technology as it becomes available. Combating cyber threats, complying with data protection requirements, and managing information are integral to the vetting process. The successful execution of the Federal personnel vetting mission requires that Federal agencies ensure:

- A. Security principles are embedded in all information technology (IT) systems in accordance with applicable law, E.O.s, rules, and regulations.
- B. Development efforts incorporate government-wide guidance that adopts private sector best practices for the agile and iterative development and delivery of new or modified IT systems and capabilities.
- C. Cutting-edge technologies are adopted to improve both quality and timeliness of personnel vetting, while outdated and legacy IT capabilities are decommissioned.
- D. Federal IT shared services are used to maximize return on investment, reduce duplication, and improve effectiveness.

# X. Awareness and Organizational Culture

A Federal trusted workforce requires that all levels of the Federal Government use good risk management techniques and promote an effective security posture. A strong culture of personal accountability and understanding potential risks allows the personnel vetting mission to effectively function. To achieve this organizational culture:

A. All members of the trusted workforce must understand their role and take personal ownership of their responsibilities in the success of the overall personnel vetting enterprise.

B. All members of the trusted workforce must understand, support, and execute the responsibilities that accompany a favorable trust determination.
