Endangered and Threatened Wildlife and Plants; Removal of the Interior Least Tern From the Federal List of Endangered and Threatened Wildlife

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), are removing the inland population of the least tern (Interior least tern) (*Sterna* (now *Sternula*) *antillarum*), from the Federal

List of Endangered and Threatened Wildlife due to recovery. This determination is based on a thorough review of the best available scientific and commercial data, which indicates that the Interior least tern has recovered and the threats to the Interior least tern have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or threatened species under the Endangered Species Act of 1973, as amended (Act). Accordingly, the prohibitions and protections provided by the Act will no longer apply to the Interior least tern.

DATES: This rule is effective February 12, 2021.

ADDRESSES: The proposed and final rules, supporting documents, and the comments received on the proposed rule are available on the internet at <http://www.regulations.gov> under Docket No. FWS–R4–ES–2018–0082, at <https://www.fws.gov/mississippiES/>, or at <https://ecos.fws.gov>.

FOR FURTHER INFORMATION CONTACT:

Stephen Ricks, Field Supervisor, U.S. Fish and Wildlife Service, Mississippi Ecological Services Field Office, 6578 Dogwood View Parkway, Jackson, MS 39213; telephone (601) 321–1122. Individuals who use a telecommunications device for the deaf (TDD), may call the Federal Relay Service at (800) 877–8339.

SUPPLEMENTARY INFORMATION:

Executive Summary

Why we need to publish a rule. Under the Act, a species may be removed from the Federal List of Endangered and Threatened Wildlife (List) if it is determined that the species has recovered and no longer meets the definition of an endangered or threatened species. Removing a species from the List can only be completed by issuing a rule.

What this document does. This rule removes the Interior least tern (*Sterna* (now *Sternula*) *antillarum*) from the List in title 50 of the Code of Federal Regulations (50 CFR 17.11(h)) based on its recovery.

The basis for our action. Under the Act, we determine that a species is an endangered species or a threatened species based on any of five factors: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or manmade factors affecting its continued existence. We

must consider the same factors when removing a species from the List (*i.e.*, “delisting” a species). We may delist a species if we find, after conducting a status review based on the best scientific and commercial data available, that: (1) The species is extinct; (2) the species does not meet the definition of an endangered species or a threatened species (*e.g.*, because it has recovered); or (3) the listed entity does not meet the statutory definition of a species (50 CFR 424.11(e)). We have determined that the Interior least tern is not in danger of extinction now nor likely to become so in the foreseeable future based on a comprehensive review of its status and listing factors.

Accordingly, we have determined that the species may be delisted based on recovery as a result of: (1) A range extension; (2) an increase in abundance and number of breeding sites; (3) resiliency to existing and potential threats; (4) the implementation of beneficial management practices; and (5) changes in existing regulatory mechanisms that are more protective of migratory bird habitats.

Peer review and public comment. We evaluated the species’ needs, current conditions, and future conditions to prepare our October 24, 2019, proposed rule (84 FR 56977). We sought and evaluated comments from independent specialists to ensure that our determination is based on scientifically sound data, assumptions, and analyses. We also invited these peer reviewers to comment on the draft post-delisting monitoring (PDM) plan. We considered all comments and information we received during the public comment period on the proposed delisting rule and the draft PDM plan when developing this final rule.

Previous Federal Actions

On October 24, 2019, we published a proposed rule to remove the Interior least tern from the Federal List of Endangered and Threatened Wildlife (84 FR 56977). Please refer to that proposed rule for a detailed description of previous Federal actions concerning this species. The proposed rule and supplemental documents are provided at <http://www.regulations.gov> under Docket No. FWS–R4–ES–2018–0082 or at <https://www.fws.gov/mississippiES/>.
