

energy profile similar to base load operation from BLN Units 1 and 2. Storage technology with wind or solar technology could augment the variability of wind and solar power with the dispatchability of fossil generation (coal and gas) or biomass generation.

Alternative Use of Resources

The proposed action does not involve any different environmental resources beyond those previously considered in the construction permit final environmental statement.

Agencies and Persons Consulted

The NRC staff did not consult with any other Federal agencies or with the State of Alabama regarding the environmental impacts of the proposed action. However, on December 1, 2020, the NRC notified the Alabama State official, Mr. David A. Turberville, Director, Office of Radiation Control of Alabama Department of Public Health, of the proposed action. Mr. Turberville had no comments.

III. Finding of No Significant Impact

The TVA has requested the NRC to extend the dates for completing the construction of BLN Units 1 and 2. The NRC is therefore considering extending the completion dates of Construction Permit Nos. CPPR-122 and CPPR-123, issued to TVA for BLN from October 1, 2020, to October 1, 2021 (Unit 1), and CPPR-123 from October 1, 2014, to October 1, 2021 (Unit 2). Based on the review of available information, the NRC determined that the proposed action would not affect safety, would not have a significant adverse effect on the probability of an accident, and would not have any significant radiological and non-radiological environmental impacts beyond what has been described in the FES-CP and subsequent construction permit extension EAs. The NRC also considered information provided in the licensee's application and related TVA environmental documents.

Consistent with 10 CFR 51.21, the NRC conducted an environmental

review of the proposed action, and this FONSI incorporates Section II of the EA by reference in this notice. Therefore, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined there is no need to prepare an environmental impact statement for the proposed action.

This FONSI and other related environmental documents are accessible online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC's PDR reference staff by telephone at 1-800-397-4209 or 301-415-4737, or by email to pdr.resource@nrc.gov.
