SUPPLEMENTARY INFORMATION:**I. Background, Purpose and Legal Basis**

The CSX Transportation Railroad drawbridge has a vertical clearance of 5’ in the closed to navigation position and operates in accordance with 33 CFR 117.105. The CSX Railroad Company, the owner of the bridge requested to change operation of the bridge from a tended drawbridge to a remotely operated drawbridge.

CSX has completed installation of a remote operation system at the bridge and a remote control center, located in Mobile, AL. At the bridge, CSX has installed infrared cameras, closed circuit cameras and TVs, communication systems and information technology systems on the bridge that allow an operator from Mobile to monitor and control the bridge. They have also developed an operations manual that remote operators use to control each bridge.

The purpose of this test is to evaluate the impact to navigation safety and vessels reasonable ability to use the waterway while the drawbridge is operated from the CSX remote control center in Mobile, AL. The bridge’s operation schedule and methods to contact the bridge to open will remain the same.

The waterway users include recreational vessels and commercial tows; which combined requires approximately six openings a day.

The Coast Guard will inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation

from the operating regulations is authorized under 33 CFR 117.35.
