DATES: Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to claim these cultural items should submit a written request with information in support of the claim to the TVA at the address in this notice by March 1, 2021.

ADDRESSES: Dr. Thomas O. Maher, TVA, 400 West Summit Hill Drive, WT11C, Knoxville, TN 37902-1401, telephone (865) 632-7458, email tomaher@tva.gov.

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3005, of the intent to repatriate cultural items under the control of the Tennessee Valley Authority, Knoxville, TN, that meet the definition of unassociated funerary objects under 25 U.S.C. 3001.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native

American cultural items. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the unassociated funerary objects was made by TVA professional staff in consultation with representatives of the Cherokee Nation; Coushatta Tribe of Louisiana; Eastern Band of Cherokee Indians; Shawnee Tribe; The Chickasaw Nation; and The Muscogee (Creek) Nation (hereafter referred to as "The Consulted Tribes").

History and Description of the Cultural Items

From May 21 to July 28, 1937, 1,644 cultural items were removed from historic Native American burials at site 1MS32, on McKee Island, in Marshall County, AL. The McKee Island site was excavated as part of TVA's Guntersville Reservoir project by the Alabama Museum of Natural History (AMNH) at the University of Alabama, using labor and funds provided by the Works Progress Administration (WPA). Details regarding these excavations may be found in "*An Archaeological Survey of Guntersville Basin on the Tennessee River in Northern Alabama*," by William S. Webb and Charles G. Wilder. TVA acquired the site on November 12, 1936. The 1,644 unassociated funerary objects are two black glass beads and 1,642 blue glass beads.

Site 1MS32 was a midden-rich village that extended 800 feet along a ridge of the now-inundated McKee Island. Although there are no radiocarbon dates from this site, Jon Marcoux's study of glass beads from 1MS32 indicates a historic occupation in the range of A.D. 1650-1750. Analysis of the brass bells recovered from this site suggests an occupation range from the late 1600s through the 1700s. During this period multiple tribes were using the Guntersville Reservoir area. Chronicles from Spanish explorers of the 16th century and French explorers of the 17th and 18th century indicate the presence of chiefdom-level tribal entities in the southeastern United States that resemble the historic Native American chiefdoms. Linguistic analysis of place names noted by multiple Spanish explorers indicates that Koasati-speaking Muskogean groups inhabited northeastern Alabama. Early maps and research into the historic Native American occupation of northeastern Alabama indicate that the Koasati (as called by the English) or the Kaskinampo (as called by the French) were found at multiple sites in Jackson and Marshall Counties in the 17th and

18th centuries. Oral history, traditions, and expert opinions of Koasati/Kaskinampo and Muscogee (Creek) descendants indicate that this portion of the Tennessee River valley was their tribal homeland. Oral tradition also indicates that by the middle 1700s, the Koasati/Kaskinampo were leaving the Tennessee River valley and moving south.

Both British and American historians indicate that in the 1700s, some Cherokee were leaving their traditional tribal lands in the Appalachian Mountains and the Little Tennessee River watershed. In the 1770s, a group of Cherokee, often designated as the Chickamauga in historical documents, had relocated to areas northeast of the current city of Chattanooga, Tennessee. Reprisals by American militia for Cherokee support of the British during the American Revolution forced these Cherokee farther down the Tennessee River. By 1785-1790 there were named Cherokee villages in the Guntersville Reservoir area. The Koasati, Muscogee (Creek), and Cherokee all hunted in the Tennessee Valley. Based on the totality of the evidence, TVA has determined that the cultural items from historic burials at 1MS32 are culturally affiliated with Native American descendants of the Koasati/Kaskinampo or the Cherokee. These descendants include the Alabama-Coushatta Tribe of Texas (previously listed as the Alabama-Coushatta Tribes of Texas); Alabama-Quassarte Tribal Town; Cherokee Nation; Coushatta Tribe of Louisiana; Eastern Band of Cherokee Indians; The Muscogee (Creek) Nation; and the United Keetoowah Band of Cherokee Indians in Oklahoma.

Determinations Made by the Tennessee Valley Authority

Officials of the Tennessee Valley Authority have determined that:

- Pursuant to 25 U.S.C. 3001(3)(B), the 1,644 cultural items described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony and are believed, by a preponderance of the evidence, to have been removed from specific burial sites of Native American individuals.

- Pursuant to 25 U.S.C. 3001(2), these items are culturally affiliated with the Alabama-Coushatta Tribe of Texas (previously listed as the Alabama-Coushatta Tribes of Texas); Alabama-Quassarte Tribal Town; Cherokee Nation; Coushatta Tribe of Louisiana; Eastern Band of Cherokee Indians; The Muscogee (Creek) Nation; and the United Keetoowah Band of Cherokee
