SUPPLEMENTARY INFORMATION:

Title: Feral Swine Survey.

OMB Control Number: 0535–0256.

Type of Request: Intent to Seek

Approval to Revise and Extend an Information Collection for three Years.

Abstract: On Feb 3, 1999, Executive Order 13112 was signed, establishing the National Invasive Species Council. This Executive Order requires that a Council of Departments dealing with invasive species be created. This Order was enhanced by Executive Order 13751 which was signed on Dec. 5, 2016. Currently there are 16 Departments and Agencies on the Council. <https://www.doi.gov/invasivespecies/about-nisc>.

On April 2, 2014 the USDA kicked off a national effort to reduce the devastating damage caused by feral swine. In 2015 the benchmark survey was conducted in 11 States (Alabama, Arkansas, California, Florida, Georgia, Louisiana, Mississippi, Missouri, North Carolina, South Carolina, and Texas) to measure the amount of damage feral hogs caused to specific crops in these states. The target population within these states consisted of farm operations who have historically produced one or more of the following crops: Corn, soybeans, wheat, rice, peanuts, or sorghum (Texas only). The results of this benchmark survey shows that in the 11 surveyed States, there was damage to an estimated \$190 million in crops for the six target crops. The published findings from this benchmark survey can be found at <http://www.sciencedirect.com/science/article/pii/S0261219416301557>.

In 2017, this survey was conducted in the following 13 States: Alabama, Arkansas, California, Florida, Georgia, Louisiana, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas, to measure the damage to livestock that is associated with the presence of feral swine. These States were chosen because they had high feral swine densities and a significant presence of cattle, hogs, sheep and/or goats. When extrapolated to livestock producers across the 13-state region, APHIS Wildlife Services

estimated that damages sum to an annual cost of about \$40 million. The findings from this survey can be found at https://digitalcommons.unl.edu/cgi/viewcontent.cgi?article=3249&context=icwdm_usdanwrc.

In 2019 the survey was conducted in 12 States: Alabama, Arkansas, California, Florida, Georgia, Louisiana, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, and Texas. The operators in 11 of the States will be selected from operations that recently produced hay/haylage, tree nuts, melons, sugar cane, sweet potatoes, or cotton. In California, operators will be selected from operations that produced hay/haylage, tree nuts, grapes, sod, carrots, lettuce, or strawberries. APHIS Wildlife Services extrapolated crop damage estimates to the state-level in 12 states with reportable damage yielded an estimated crop loss of \$272 million/yr. The findings from this survey can be found at https://digitalcommons.unl.edu/cgi/viewcontent.cgi?article=3308&context=icwdm_usdanwrc.

In 2021, this survey will be conducted in the following 13 States: Alabama, Arkansas, California, Florida, Georgia, Louisiana, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas, to measure the damage to livestock that is associated with the presence of feral swine. These States were chosen because they had high feral swine densities and a significant presence of cattle (dairy and/or beef), hogs, sheep and/or goats.

The Animal and Plant Health Inspection Service (APHIS), Wildlife Services' (WS) National Wildlife Research Center (NWRC) is the only Federal research organization devoted exclusively to resolving conflicts between people and wildlife through the development of effective, selective, and socially responsible methods, tools, and techniques. As increased urbanization leads to a loss of traditional wildlife habitat, the potential for conflicts between people and wildlife increases. Such conflicts can take many forms, including property and natural resource damage, human health and safety concerns, and disease transmission among wildlife, livestock, and humans.

Free-ranging populations of feral swine exist in at least 35 states, and the nationwide population is estimated at

approximately 6 million animals. Feral swine damage: Pastures, agricultural crops, lawns, landscaping, and natural areas due to feeding, rooting, wallowing, grazing, and trampling activities. Feral swine are reservoirs of many diseases and act as a host to parasites that can negatively impact agricultural animals, especially swine.

Authority: These data will be collected under the authority of 7 U.S.C. 2204(a). The eradication of feral swine is authorized by the Animal Health Protection Act (Title 7 U.S.C. 8301 *et seq.*) and the 2014 Farmbill. The \$20 million program aims to help states deal with a rapidly expanding population of invasive feral swine.

Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985, as amended, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents. This Notice is submitted in accordance with the Paperwork Reduction Act of 1995 Public Law 104-13 (44 U.S.C. 3501, *et seq.*) and Office of Management and Budget regulations at 5 CFR part 1320.

NASS also complies with OMB Implementation Guidance, "Implementation Guidance for Title V of the E-Government Act, Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA)," **Federal Register**, Vol. 72, No. 115, June 15, 2007, p. 33362.

Estimate of Burden: Reporting burden for this collection of information is estimated to average 30 minutes per response. This was determined by our Survey Methodologists, who conducted 19 cognitive interviews in seven states. They also took into account the projected number of farmers who will skip some sections of the questionnaire due to the presence or absence of damage due to feral swine. NASS will be utilizing several pieces of publicity and informational materials to encourage respondents to participate in this important survey. Publicity materials and instruction sheets will account for 10 minutes of additional burden per respondent. Respondents who refuse to complete a survey will be allotted 2 minutes of burden per attempt to collect the data.

NASS will conduct the survey initially by mail and then followed up with phone attempts for non-response.

Respondents: Farm and Ranch Operators.

Estimated Annual Number of Respondents: 18,000.

Estimated Total Annual Burden on Respondents: 9,700 hours.

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, technological or other forms of information technology collection methods.

All responses to this notice will become a matter of public record and be summarized in the request for OMB approval.

Signed at Washington, DC, January 29, 2021.

Kevin L. Barnes,

Associate Administrator.
