

The burden for this information collection has changed since the last OMB approval. FDA estimates that the total burden for this collection will be 583,473 hours (1,818 reporting + 495,247 recordkeeping + 86,408 third-party disclosure). Our estimated burden for the information collection reflects an overall increase of 79,024 hours. We attribute this adjustment to an increase in the number of blood establishments during the last 3 years.

Title of the Collection: Appellant Climate Survey.

Type of Collection: Revision.

OMB No. 0990-0330.

Abstract: The annual OMHA Appellant Climate Survey is a survey of Medicare beneficiaries, providers, suppliers, or their representatives who participated in a hearing before an Administrative Law Judge (ALJ) from OMHA. Appellants dissatisfied with the

outcome of their Level 2 Medicare appeal may request a hearing before an OMHA ALJ. The Appellant Climate Survey will be used to measure appellant satisfaction with their OMHA appeals experience, as opposed to their satisfaction with a specific ruling. OMHA was established by the Medicare Prescription Drug, Improvement, and Modernization Act (MMA) of 2003 (Pub. L. 108–173) and became operational on July 1, 2005. The MMA legislation and implementing regulations issued on March 8, 2007, instituted a number of changes in the appeals process. The MMA legislation also directed HHS to consider the feasibility of conducting hearings using telephone or video-

teleconference (VTC) technologies. In carrying out this mandate, OMHA makes use of both telephone and VTC to provide appellants with a vast nationwide network Field Offices for hearings. The first 3-year administration cycle of the OMHA survey began in fiscal year (FY) 2008, a second 3-year cycle began in FY 2011, a third 3-year cycle began in FY 2014, and a fourth 3-year cycle began in FY 2018. The survey will continue to be conducted annually over a 3-year period with the next data collection cycle beginning in FY 2021. Data collection instruments and recruitment materials will be offered in English and Spanish. The estimated total number of respondents per FY

starting FY 2021 is 800 respondents. The estimated total annual burden hours starting FY 2021 is 200 hours.

Type of respondent; frequency (annual, quarterly, monthly, etc.); and the affected public (individuals, public or private businesses, state or local governments, etc.) The survey will be conducted annually, and survey respondents will consist of Medicare beneficiaries and non-beneficiaries (*i.e.*, providers, suppliers) who participated in a hearing before an OMHA ALJ. OMHA will draw a representative, nonredundant sample of appellants whose cases have been closed in the last 6 months.

ESTIMATED ANNUALIZED BURDEN HOUR TABLE

Type of respondent	Number of respondents	Number responses per respondent	Average burden per response (in hours)	Total burden hours
Beneficiaries	400	1	15/60	100
Non-Beneficiaries	400	1	15/60	100
Total	800	1	15/60	200
