DEPARTMENT OF ENERGY

[OE Docket No. PP-481-1]

Application To Amend Presidential Permit; CHPE LLC

AGENCY: Office of Electricity, Department of Energy.

ACTION: Notice of application.

SUMMARY: CHPE LLC (Applicant or CHPE) has filed a supplement to its application to amend Presidential Permit No. PP–481. CHPE LLC seeks to further amend its permit application to allow for certain modifications to the previously permitted project.

DATES: Comments, protests, or motions to intervene must be submitted on or before March 31, 2021.

ADDRESSES: Comments or motions to intervene should be addressed to Christopher Lawrence,

Christopher.Lawrence@hq.doe.gov.

FOR FURTHER INFORMATION CONTACT: Christopher Lawrence (Program Office) at 202–586–5260 or by email to Christopher.Lawrence@hq.doe.gov, or Christopher Drake (Attorney-Adviser) at 202–586–2919 or by email to

Christopher.Drake@hq.doe.gov.

SUPPLEMENTARY INFORMATION: The
construction, operation, maintenance,
and connection of facilities at the
international border of the United States
for the transmission of electric energy
between the United States and a foreign
country is prohibited in the absence of

a Presidential permit issued pursuant to

Executive Order (E.O.) 10485, as amended by E.O. 12038.

On September 25, 2020, CHPE filed an application with the Office of Electricity of the Department of Energy (DOE), as required by regulations at 10 CFR 205.320 et seq., requesting that DOE amend Presidential Permit No. PP–481 to allow for changes in the route previously permitted (Amendment Application). Notice of that application was published in the Federal Register on October 5, 2020 (85 FR 62,721).

On January 15, 2021, CHPE filed a supplement to its Amendment Application asking DOE to amend Presidential Permit No. PP-481 to increase the capacity of the proposed Project from 1,000 megawatts (MW) to 1,250 MW. Since the filing of the Amendment Application last September, the New York Independent System Operator (NYISO) completed a System Reliability Impact Study (SRIS) that assessed the potential impact of increasing the Project's transmission capacity from 1,000 MW to 1,250 MW. The SRIS determined that the Project can interconnect and operate at 1.250 MW without adversely affecting the reliability of the interstate transmission grid. In addition to the completed SRIS, an expert retained by CHPE completed an analysis of the potential impacts of operating a 1,250 MW transmission line. This analysis, which addressed magnetic fields, compass deviations, and thermal cable losses, determined that there would be no material change in impacts beyond those identified for the permitted 1,000 MW project.

Procedural Matters: Any person may comment on this application by filing such comment at the address provided above. Any person seeking to become a party to this proceeding must file a motion to intervene at the address provided above in accordance with Rule 214 of the Federal Energy Regulatory
