Expiration Date of Approval: Not applicable.

Type of Request: Intent to seek approval to reinstate an information collection.

Abstract

Proposed Project: The purpose of the NSF Graduate Research Fellowship Program is to help ensure the vitality and diversity of the scientific and engineering workforce of the United States. The program recognizes and supports outstanding graduate students who are pursuing research-based master's and doctoral degrees in science, technology, engineering, and mathematics (STEM) and in STEM education. The GRFP provides three years of support, to be used during a five-year fellowship period, for the graduate education of individuals who have demonstrated their potential for significant research achievements in STEM and STEM education.

The Graduate Research Fellowship Program uses several sources of information in assessing and documenting program performance and impact. These sources include reports from program evaluation, the GRFP Committee of Visitors, and data compiled from the applications. In addition, GRFP Fellows submit annual activity reports to NSF.

The GRFP Completion report is proposed as a continuing component of the annual reporting requirement for the program. This report, submitted by the GRFP Institution, certifies the completion status of Fellows at the institution (e.g., in progress, completed, graduated, transferred, or withdrawn). The existing Completion Report, Grants Roster Report, and the Program Expense Report comprise the GRFP Annual Reporting requirements from the Grantee GRFP institution. Through submission of the Completion Report to NSF GRFP institutions certify the current status of all GRFP Fellows at the institution as either: In Progress, Graduated, Transferred, or Withdrawn. For Graduate Fellows with Graduated status, the graduation date is a required reporting element. Collection of this information allows the program to obtain information on the current status of Fellows, the number and/or percentage of Graduate Fellowship recipients who complete a science or engineering graduate degree, and an estimate of time to degree completion. The report must be certified and submitted by the institution's designated Coordinating Official (CO) annually.

Use of the Information: The completion report data provides NSF with accurate Fellow information regarding completion of the Fellows'

graduate programs. The data is used by NSF in its assessment of the impact of its investments in the GRFP, and informs its program management.

Estimate of Burden: Overall average time will be 15 minutes per Fellow (8,250 Fellows) for a total of 2,063 hours for all institutions with Fellows. An estimate for institutions with 12 or fewer Fellows will be 1 hour, institutions with 12–48 fellows will be 4 hours, and institutions over 48 Fellows will be 10 hours.

Respondents: Academic institutions with NSF Graduate Fellows (GRFP Institutions).

Estimated Number of Responses per Report: One from each of the 271 current GRFP institutions.

Dated: March 1, 2021.

POSTAL SERVICE

Notice of Intent To Prepare an Environmental Impact Statement for Purchase of Next Generation Delivery Vehicles

AGENCY: U.S. Postal Service.

ACTION: Notice.

SUMMARY: The U.S. Postal Service announces its intention to prepare an Environmental Impact Statement (EIS) for the purchase over 10 years of 50,000 to 165,000 purpose-built, right-hand-drive vehicles—the Next Generation Delivery Vehicle (NGDV)—to replace existing delivery vehicles nationwide that are approaching the end of their service life. While the Postal Service has not yet determined the precise mix of the powertrains in the new vehicles to be purchased, current plans are for the new vehicle purchases to consist of a mix of internal combustion engine and battery electric powertrains; the purchases will also be designed to be capable of retrofits to keep pace with advances in electric vehicle technologies. The EIS will evaluate the environmental impacts of the purchase and operation of the NGDV, as well as a commercial off-the-shelf (COTS) vehicle alternative and a “no action” alternative.

DATES: Comments should be received no later than April 5, 2021. The Postal Service will also publish a Notice of Availability to announce the availability of the Draft EIS and solicit comments on

the Draft EIS during a 45-day public comment period.

ADDRESSES: Interested parties may direct comments, questions or requests for additional information to: Mr. Davon Collins, Environmental Counsel, United States Postal Service, 475 L’Enfant Plaza SW, Washington, DC 20260–6201, or at NEPA@usps.gov. Note that comments sent by mail may be subject to delay due to federal security screening.

SUPPLEMENTARY INFORMATION: This notice concerns the proposed purchase over 10 years of 50,000 to 165,000 new purpose-built delivery vehicles to replace the same number of existing delivery vehicles, and the intent of the U.S. Postal Service, pursuant to the requirements of the National Environmental Policy Act of 1969 (NEPA), its implementing procedures at 39 CFR 775, and the President’s Council on Environmental Quality Regulations (40 CFR parts 1500–1508), to prepare an EIS to evaluate the environmental impacts of the proposed action versus a COTS vehicle alternative and a “no action” alternative. The EIS will consider the physical, biological, cultural, and socioeconomic environments. To assist in this process, the Postal Service is soliciting the public’s input and comments.
