

the functions of the Secretary as provided in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451 *et seq.*). These statutes mandate that FSIS protect the public by ensuring that meat and poultry products are safe, wholesome, unadulterated, and properly labeled and packaged. FSIS regulations establish a common or usual name for raw meat and poultry products that do not meet standard or identity regulations and to which solutions have been added. Products with added solutions are sometimes called referred to as “enhanced products.”

Need and use of the Information: FSIS requires establishments that manufacture products containing added solutions to label the products with a descriptive designation that provides an accurate description of the raw meat or poultry component, the percentage of added solution incorporated into the raw meat or poultry product, and the individual ingredients or multi-ingredient components in the solution listed in the descending order of predominance by weight on the product label. FSIS also requires that the product name and the descriptive designation be printed in a single easy-to-read type style and color and on a single-color contrasting background.
