Communications Act of 1934, as amended, 47 U.S.C. 610.

Total Annual Burden: 7,242 hours.

Total Annual Cost: \$487,500.

Nature and Extent of Confidentiality:

An assurance of confidentiality is not offered because this information collection does not require the collection of personally identifiable information from individuals.

Privacy Impact Assessment: No impact(s).

Needs and Uses: This notice and request for comments pertains to the extension of the currently approved information collection requirements concerning hearing aid compatibility (HAC) for wireline handsets used with the legacy telephone network and with advanced communications services (ACS), such as Voice over internet Protocol (VoIP). The latter are known as ACS telephonic customer premises equipment (ACS telephonic CPE).

Beginning in the 1980s, the Commission adopted a series of regulations to implement statutory directives requiring wireline telephone handsets in the United States (for use with the legacy telephone network) to be hearing aid compatible. In 2010, the Twenty-First Century Communications and Video Accessibility Act (CVAA), Public Law 111–260, sec. 102, 710(b), 124 Stat. 2751, 2753 (CVAA) (codified at 47 U.S.C. 610(b)), amended by Public Law 111–265, 124 Stat. 2795 (technical corrections to the CVAA), amended section 710(b) of the Communications Act of 1934, to apply the HAC requirements to ACS telephonic CPE, including VoIP telephones. In accordance with this provision, the Commission adopted *Access to Telecommunications Equipment and Services by Persons with Disabilities et al.*, Report and Order and Order on Reconsideration, FCC 17–135, released October 26, 2017, which amended the HAC rules to cover ACS telephonic CPE to the extent such devices are designed to be held to the ear and provide two-way voice communication via a built-in speaker.

The information collections contain third-party disclosure and labeling requirements. The information is used to inform consumers who purchase or use wireline telephone equipment whether the telephone is hearing aid compatible; to ensure that manufacturers comply with applicable regulations and technical criteria; to ensure that information about ACS telephonic CPE is available in a database administered by the Administrative Council for Terminal Attachments (ACTA) (an organization, previously created pursuant to FCC

regulations, whose key function is to maintain a database of telephone equipment); and to facilitate the filing of complaints about the ACS telephonic CPE.

Wireline Handsets Used With the Legacy Telephone Network

- 47 CFR 68.224 requires that every non-hearing aid compatible wireline telephone used with the legacy wireline network that is offered for sale to the public contain in a conspicuous location on the surface of its packaging a statement that the telephone is not hearing aid compatible. If the handset is offered for sale without a surrounding package, then the telephone must be affixed with a written statement that the telephone is not hearing aid compatible. In addition, each handset must be accompanied by instructions in accordance with 47 CFR 62.218(b)(2).

- 47 CFR 68.300 requires that all wireline telephones used with the legacy wireline network that are manufactured in the United States (other than for export) or imported for use in the United States and that are hearing aid compatible have the letters “HAC” permanently affixed.

ACS Telephonic CPE

- 47 CFR 68.502(a) of the Commission’s rules contains information collection requirements for ACS telephonic CPE that are similar to the HAC label and notice requirements in 47 CFR 68.224 and 68.300 (discussed above), *i.e.*, the “HAC” labeling requirement for hearing aid compatible equipment, and the package information for non-hearing aid compatible equipment, apply to ACS telephonic CPE.

- 47 CFR 68.501 of the Commission’s rules requires responsible parties to obtain certifications of their equipment by using a third-party Telecommunications Certification Body (TCB) or a Supplier’s Declaration of Conformity. (A responsible party is the party, such as the manufacturer, that is responsible for the compliance of ACS telephonic CPE with the hearing aid compatibility rules and other applicable technical criteria. A Supplier’s Declaration of Conformity is a procedure whereby a responsible party makes measurements or takes steps to ensure that CPE complies with technical standards, which results in a document by the same name.) Section 68.501 of the Commission’s rules applies to ACS telephonic CPE the rule sections defining the roles of TCBs and the uses of Supplier’s Declarations of Conformity for wireline handsets used with the legacy telephone network.

- 47 CFR 68.504 of the Commission’s rules requires information about ACS telephonic CPE to be included in a database administered by ACTA. In addition, ACS telephonic CPE must be labeled as required by ACTA.

- 47 CFR 68.502(b)–(d) of the Commission’s rules requires responsible parties to: Warrant that ACS telephonic CPE complies with applicable regulations and technical criteria; give the user instructions required by ACTA for ACS telephonic CPE that is hearing aid compatible; give the user a notice for ACS telephonic CPE that is not hearing aid compatible; and notify the purchaser or user of ACS telephonic CPE whose approval is revoked, that the purchaser or user must discontinue its use.

- 47 CFR 68.503 of the Commission’s rules requires manufacturers of ACS telephonic CPE to designate an agent for service of process for complaints that may be filed at the FCC.

Applications for Waiver of HAC Requirements

- 47 CFR 68.5 requires that telephone manufacturers seeking a waiver of 47 CFR 68.4(a)(1) (requiring that certain telephones be hearing aid compatible) demonstrate that compliance with the rule is technologically infeasible or too costly. Information is used by FCC staff to determine whether to grant or dismiss the request.
