Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from the Commission's Office of External Affairs, at (866) 208-FERC, or on the FERC website at www.ferc.gov using the "eLibrary" link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to www.ferc.gov/docs-filing/esubscription.asp.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. AD21–13–000]

Climate Change, Extreme Weather, and Electric System Reliability; Notice of Technical Conference

Take notice that Federal Energy Regulatory Commission (Commission) staff will convene a technical conference to discuss issues surrounding the threat to electric system reliability posed by climate change and extreme weather events. Commissioners may attend and participate in the technical conference.

Reliable electric service is vital to the nation's economy, national security, and

public health and safety, and prolonged power outages can have significant humanitarian consequences, as the nation recently witnessed in Texas and the south-central United States. This technical conference will address concerns that because extreme weather events are increasing in frequency,¹ intensity, geographic expanse, and duration, the number and severity of weather-induced events in the electric power industry may also increase.²

This technical conference will also address the specific challenges posed to electric system reliability by climate change and extreme weather, which may vary by region. For example, addressing the reliability challenges associated with wildfires may not be appropriate in a region where a different challenge, such as weather-driven fuel supply interruptions, is more likely to occur.

Through this proceeding in Docket No. AD21–13–000, the Commission seeks to understand the near, medium and long-term challenges facing the regions of the country; how decisionmakers in the regions are evaluating and addressing those challenges; and whether further action from the Commission is needed to help achieve an electric system that can withstand, respond to, and recover from extreme weather events.

The technical conference will be held on the afternoons of Tuesday, June 1, 2021 and Wednesday, June 2, 2021 from approximately 1 p.m. to 5:00 p.m. Eastern Time each day. The technical conference will be held via teleconference (over WebEx) and will be open to the public. Registration for the conference is not required and there is no fee for attendance. A supplemental notice will be issued seeking comments prior to the technical conference. Following comment submissions, an additional supplemental notice will be issued with further details regarding the technical conference agenda, as well as

¹ According to a recent report from the National Oceanic and Atmospheric Administration, extreme weather events topping \$1 billion in estimated damages and costs are occurring with increasing frequency. Events with severe consequences are becoming more frequent and intense due to climate change, and these events have been the principal contributors to an observed increase in the frequency and duration of power outages in the United States.”).
