

pilots who elect to navigate via the airways through the affected area could also take advantage of the adjacent VOR Federal airways or ATC services listed previously.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 to revoke VOR Federal airway V-271 and amend VOR Federal airways V-285 due to the planned decommissioning of the Manistee, MI, VOR, in the vicinity of Manistee, MI. The proposed VOR Federal airway amendments are described below.

V-271: V-271 currently extends between the Manistee, MI, VOR/DME and the Escanaba, MI, VOR/DME. The FAA proposes to revoke the airway.

V-285: V-285 currently extends between the Brickyard, IN, VOR/Tactical Air Navigation (VORTAC) and the Traverse City, MI, VOR/DME. The FAA proposes to delete a portion of the airway between the White Cloud, MI, VOR/DME and the Traverse City, MI, VOR/DME. The airway would then terminate at the White Cloud, MI, VOR/DME. The unaffected portions of the existing airway would remain as charted.

All radials in the VOR Federal airway descriptions below are unchanged and stated in True degrees.

VOR Federal airways are published in paragraph 6010(a) of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The airways listed in this document would be subsequently updated in the next edition of this Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant

economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would establish Class E airspace extending upward from 700 feet above the surface of the earth to support IFR operations at El Capitan Lodge, Craig, AK.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Persons wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. FAA-2021-0081; Airspace Docket No. 20-AAL-61". The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020. FAA Order 7400.11E is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by establishing Class E airspace extending upward from 700 feet above the surface of the earth at El Capitan Lodge, Craig, AK.

This action is associated with a sea plane base, and therefore, the Class E airspace would be established extending upward from 700 feet above ground level (AGL) within a 2-mile radius of the airport's sea lane versus the Lodge. In addition, airspace extending upward from 700 feet AGL would be established 1.9 miles each side of the 353° bearing from a point-in-space, coordinates lat. 55°58'6" N, long. 133°15'59" W., extending from the 2-mile radius 8.5 miles north. This area would provide controlled airspace for aircraft as they descend below 1,500 feet AGL. The airspace extending upward from 700 feet would also include the area 2 miles each side of the 232° bearing from the point-in-space extending from the 2-mile radius 4 miles southwest. This area would provide controlled airspace for the missed approach procedure.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR part 71.1. The Class E airspace designations listed in this document

will be published subsequently in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

I. Background

The State of Utah’s regulation R307-401-10 was originally submitted on September 20, 1999 and was titled “Low Oxides of Nitrogen Burner Technology.” The Utah permitting regulations were reorganized and renumbered in Utah’s September 15, 2006 submittal, The “Low Oxides of Nitrogen Burner Technology” was deleted and moved to R307-328 “Ozone Nonattainment and Maintenance Areas in Utah and Weber Counties Gasoline Transfer and Storage”; R307-401-10 was then replaced with the title: “Source Category Exemptions.” These revisions were acted on in EPA’s rulemaking “Approval and Promulgation of Air
