Current Actions: This Notice proposes the clearance of Evaluation of the Reopening Archives, Libraries, and Museums (REALM) Project research study. The 60-day Notice was published in the **Federal Register** on October 16, 2020 (85 FR 65878). The agency received one comment in response to this Notice.

The REALM Project is convening individuals from Institute of Museum and Library Services (IMLS), OCLC Inc. (OCLC), Battelle, and several key actors in the libraries, archives, and museums (LAM) fields to bring their expertise and on-the-ground experience together to develop science-based information about how materials can be handled to mitigate COVID-19 exposure to staff and visitors of LAM institutions as COVID-19 restrictions begin lifting across the country. This project extends the guidance available from the Centers for Disease Control and Prevention (CDC) by providing information that is specifically relevant to LAM institutions. Given that LAM institutions work with physical materials that are often circulated among the public, LAM institutions have unique concerns about how they can optimize their operations while minimizing the potential for spreading the Coronavirus. This evaluation will be focused on understanding the extent to which the professionals from LAM institutions have found that the REALM Project's research test results and toolkit resources have met their needs. Data will be collected through a survey of organizations that have used the test results and toolkit developed by the REALM project and focus groups representing members of the museum and archive community who have not been engaged with the project. The evaluation is intended to provide information to OCLC and IMLS around the usefulness of the scientific information shared to the LAM community as well as the effectiveness of its distribution. The evaluation has

not been designed to be a retrospective consideration of the REALM Project, but rather to inform decision-makers at OCLC and IMLS, in near real-time, as to what is working and what is not enabling them to modify the efforts of the project's Working Groups and Steering Committee as well as to adjust methods of distribution of information to the larger LAM community.
