SUPPLEMENTARY INFORMATION:

Introduction

On April 20, 2010, the Deepwater Horizon (DWH) mobile drilling unit exploded, causing a massive release of oil from the BP Exploration and Production Inc. (BP) Macondo well. The explosion and oil spill led to loss of life and extensive natural resource injuries. Oil spread from the deep ocean to surface and nearshore environments across the Gulf of Mexico, from Texas to Florida. Extensive response actions were undertaken to reduce harm to people and the environment. However,

many of these response actions had collateral impacts on the environment and on natural resource services.

The DWH Federal and State natural resource trustees (DWH Trustees) conducted the natural resource damage assessment for the DWH oil spill under OPA (33 U.S.C. 2701 *et seq.*). Pursuant to OPA, Federal and State agencies act as trustees on behalf of the public to assess natural resource injuries and losses and to determine the actions required to compensate the public for those injuries and losses. OPA further instructs the designated trustees to develop and implement a plan for the restoration, rehabilitation, replacement, or acquisition of the equivalent of the injured natural resources under their trusteeship, including the loss of use and services from those resources from the time of injury until the time of restoration to baseline (the resource quality and conditions that would exist if the spill had not occurred) is complete.

The DWH Trustees are:

- U.S. Department of the Interior (DOI), as represented by the National Park Service, U.S. Fish and Wildlife Service, and Bureau of Land Management;
- National Oceanic and Atmospheric Administration (NOAA), on behalf of the U.S. Department of Commerce;
- U.S. Department of Agriculture (USDA);
- U.S. Environmental Protection Agency (EPA);
- State of Louisiana Coastal Protection and Restoration Authority (CPRA), Oil Spill Coordinator's Office, Department of Environmental Quality, Department of Wildlife and Fisheries, and Department of Natural Resources;
- State of Mississippi Department of Environmental Quality;
- State of Alabama Department of Conservation and Natural Resources and Geological Survey of Alabama;
- State of Florida Department of Environmental Protection and Fish and Wildlife Conservation Commission; and
- State of Texas: Texas Parks and Wildlife Department, Texas General Land Office, and Texas Commission on Environmental Quality.

The DWH Trustees reached and finalized a settlement of their natural resource damage claims with BP in an April 4, 2016, Consent Decree approved by the United States District Court for the Eastern District of Louisiana. Pursuant to that Consent Decree, restoration projects in the Regionwide Restoration Area are selected and implemented by the Regionwide TIG. The Regionwide TIG is composed of the Federal and State Trustees listed above.

Background

On September 24, 2019, the Regionwide TIG posted a public notice at <http://www.gulfspillrestoration.noaa.gov> requesting new or revised natural resource restoration project ideas for the Regionwide Restoration Area. The notice stated that the Regionwide TIG was seeking project ideas for the following Restoration Types: (1) Birds, (2) Marine Mammals, (3) Oysters; and (4) Sea Turtles. On July 1, 2020 the Regionwide TIG announced that it had initiated drafting of its first post settlement draft restoration plan including restoration projects for Birds, Marine Mammals, Oysters and Sea Turtles.

The Regionwide TIG also analyzes a No Action alternative. One or more alternatives may be selected for implementation by the Regionwide TIG in the Final RP/EA or in future restoration plans.

The Regionwide TIG has examined the injuries assessed by the DWH Trustees and evaluated restoration alternatives to address the injuries. In the Draft RP/EA, the Regionwide TIG presents to the public its draft plan for providing partial compensation to the public for injured natural resources and ecological services in the Regionwide Restoration Area. The proposed alternatives are intended to continue the

process of using DWH restoration funding to restore natural resources injured or lost as a result of the Deepwater Horizon oil spill. The total estimated cost of the projects proposed as preferred is approximately \$99.6 million. Additional restoration planning for the Regionwide Restoration Area will continue.

Next Steps

The public is encouraged to review and comment on the Draft RP/EA. Virtual public meetings are scheduled to facilitate the public review and comment process. Each virtual meeting will include an informal open house period to accommodate general questions from the public in topic areas followed by a formal presentation of the Draft RP/EA. Following the presentation, public comment will be taken through the virtual meeting platform.

Presentation slides, project fact sheets, and a recording of the webinar will be posted on the Regionwide TIG website. The public may register for the virtual public meetings at the link below.

After the public comment period ends, the Regionwide TIG will consider and address the comments received before issuing a Final RP/EA. A summary of comments received and the Regionwide TIG's responses and any revisions to the document, as appropriate, will be included in the final document.
