All catch would be attributed to the appropriate commercial fishing quota. For a vessel fishing on a groundfish sector trip, all catch of groundfish stocks allocated to sectors would be deducted from the vessel’s sector’s annual catch entitlement (ACE). Once the ACE for a stock has been reached in a sector, vessels would no longer be allowed to fish in that stock area unless the sector acquired additional ACE for the stock in question. For common pool vessels, all groundfish catch would be counted toward the appropriate trimester total allowable catch (TAC). Common pool vessels would be exempt from the possession and trip limits listed in Table 1, but would still be subject to trimester TAC closures.

If approved, the Center may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impact that does not change the scope of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

[Docket No. PTO-P-2021-0005]

Administrative Updates to the General Requirements Bulletin for Admission to the Examination for Registration To Practice in Patent Cases Before the United States Patent and Trademark Office

AGENCY: United States Patent and Trademark Office, Department of Commerce.

ACTION: Request for comments.

SUMMARY: This request for comments seeks public input on proposed administrative updates to the General Requirements Bulletin for Admission to the Examination for Registration to Practice in Patent Cases Before the United States Patent and Trademark Office (GRB). There are three categories of technical and scientific qualifications that may typically make applicants eligible: Category A for specified bachelor's degrees, Category B for other bachelor's degrees with technical and scientific training, and Category C for practical engineering or scientific experience, which may be demonstrated by passing the Fundamentals of Engineering test. The United States Patent and Trademark Office (Office or USPTO) evaluates the criteria for applicants to sit for the registration examination on an ongoing basis. Based on this ongoing evaluation, the USPTO is looking into changing the criteria to: Add common Category B degrees to Category A, accept advanced degrees (*i.e.*, master's and doctoral degrees) under Category A, and accept a combination of core sciences under Category B, Options 2 and 4, so long as one of the core science courses has a lab component.

DATES: Comment Deadline Date: Written comments must be received on or before May 24, 2021.

ADDRESSES: For reasons of government efficiency, comments must be submitted through the Federal eRulemaking Portal at www.regulations.gov. To submit comments via the portal, one should

enter docket number PTO-P-2021-0005 on the homepage and click "Search." The site will provide search results listing all documents associated with this docket. Commenters can find a reference to this notice and click on the "Comment" icon, complete the required fields, and enter or attach their comments. Attachments to electronic comments will be accepted in portable document format (PDF) or DOCX format. Because comments will be made available for public inspection, information that the submitter does not desire to make public, such as an address or phone number, should not be included in the comments.

Visit the Federal eRulemaking Portal for additional instructions on providing comments via the portal. If electronic submission of and access to comments is not feasible due to a lack of access to a computer and/or the internet, please contact the USPTO using the contact information below for special instructions.

William Covey, OED Director, by telephone at 571-272-4097 or by email at oed@uspto.gov.

SUPPLEMENTARY INFORMATION:

Summary

In this request for comments, the Office seeks feedback and information regarding proposed administrative updates to the GRB to the criteria of applicants who sit for the registration examination.

Background

The Director of the USPTO is given statutory authority to require a showing by patent practitioners that they possess "the necessary qualifications to render applicants or other persons valuable service, advice, and assistance in the presentation or prosecution of their applications or other business before the Office." 35 U.S.C. 2(b)(2)(D). Thus, courts have determined that the USPTO Director bears primary responsibility for protecting the public from unqualified practitioners.

Pursuant to that responsibility, USPTO regulations provide that registration to practice in patent matters before the USPTO requires a practitioner to, *inter alia*, demonstrate possession of scientific and technical qualifications.¹ The role of patent

¹ Legal representation before Federal agencies is generally governed by the provisions of 5 U.S.C. 500, which effectively defers to the individual States as to who may act as an attorney. That statute, however, provides a specific exception for representation in patent matters before the USPTO.
