Endangered and Threatened Wildlife and Plants; Reclassification of the Hawaiian Stilt From Endangered to Threatened With a Section 4(d) Rule

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), propose to reclassify (downlist) the Hawaiian stilt (*Himantopus mexicanus knudseni*) from endangered to threatened under the Endangered Species Act of 1973, as amended (Act). After a review of the best available scientific and commercial information, we find that the subspecies' status has improved such that it is not currently in danger of extinction throughout all or a significant portion of its range, but that it is still likely to become so in the foreseeable future. We also propose a rule under section 4(d) of the Act that provides for the conservation of the Hawaiian stilt. Additionally, we also recognize the name “aéo” as an alternative common name.

DATES: We will accept comments received or postmarked on or before May 24, 2021. Comments submitted electronically using the Federal eRulemaking Portal (*see* **ADDRESSES**, below) must be received by 11:59 p.m. Eastern Time on the closing date. We
