Title of the Collection: National Blood Collection & Utilization Survey (NBCUS).

Type of Collection: Revision.

OMB No. 0990-0313 Office of the Assistant Secretary for Health OASH/HHS.

Abstract

The Office of the Assistant Secretary for Health (OASH) is requesting approval for a three-year revised information collection request (ICR) titled "National Blood Collection & Utilization Survey (NBCUS)." The NBCUS is a biennial survey that includes a core of standard questions on blood collection, processing, and utilization practices. Questions on transfusion transmitted infections, transfusion associated circulatory overload, acute hemolysis, delayed hemolysis, and severe allergic reactions are also included in the survey. The rapidly changing environment in blood supply and demand makes it important to have regular, periodic data describing the state of U.S. blood collections and transfusions for understanding the dynamics of blood safety and availability. Two sections were added to the survey to capture information on the impact of the COVID-19 pandemic on the blood supply during the course of 2020 only. These data will be valuable, when compared to previous years, for

understanding the effects of a major pandemic on the health system. Survey respondents will consist of blood collection centers, cord blood

banks and hospitals that perform blood transfusions, except those reporting fewer than 100 inpatient surgeries per year. For the purposes of this ICR,

federal burden is only being placed on facilities located within the fifty states and the District of Columbia. Total estimated burden is 9,064 hours.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Number of respondents	Number responses per respondent	Average burden per response (in hours)	Total burden hours
Transfusing Hospitals	2,140	1	4	8,560
Hospital Blood Banks	76	1	4	304
Community-based blood center	50	1	4	200
Total	2,266	9,064

Dated: March 19, 2021.
