

take all possible steps to assess the collision risk, and will mitigate the collision risk if necessary. As appropriate, steps to assess and mitigate the collision risk should include, but are not limited to: Contacting the operator of any active spacecraft involved in such a warning; sharing ephemeris data and other appropriate operational information with any such operator; and modifying space station attitude and/or operations.

(6) For NGSO space stations the disclosure must describe the extent of satellite maneuverability.

(7) The disclosure must address trackability of the space station(s). For NGSO space stations the disclosure must also include: (a) How the operator plans to identify the space station(s) following deployment and whether the space station tracking will be active or passive; (b) whether, prior to deployment the space station(s) will be registered with the 18th Space Control Squadron or successor entity; and (c) the extent to which the space station operator plans to share information regarding initial deployment, ephemeris, and/or planned maneuvers with the 18th Space Control Squadron or successor entity, other entities that engage in space situational awareness or space traffic management functions, and/or other operators.

(8) For NGSO space stations, additional disclosures must be provided regarding spacecraft disposal, including, for some space stations, a demonstration that the probability of success of the chosen disposal method is 0.9 or greater for any individual space station, and for multi-satellite systems, a demonstration including additional information regarding efforts to achieve a higher probability of success.

SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501-3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might “further reduce the information collection burden for small business concerns with fewer than 25 employees.”

OMB Control Number: 3060-0298.

Title: Part 61, Tariffs (Other than the Tariff Review Plan).

Form Number: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 2,925 respondents; 9,585 responses.

Estimated Time per Response: 1-50 hours.

Frequency of Response: On occasion, annual, biennial, and one-time reporting requirements.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. Sections 151-155, 201-205, 208, 251-271, 403, 502 and 503 of the Communications Act of 1934 (Act), as amended.

Total Annual Burden: 244,477 hours.

Total Annual Cost: \$1,584,000.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: Respondents are not being asked to submit confidential information to the Commission. If the Commission requests respondents to submit

information which respondents believe are confidential, respondents may request confidential treatment of such information under 47 CFR 0.459 of the Commission's rules.

Needs and Uses: On October 9, 2020, the Commission released the 8YY (toll free) Access Charge Reform Order, FCC 20-143, that transitions intercarrier compensation for toll free services either to lower, uniform rate caps or to bill-and-keep over approximately three years as a means of curtailing abuse of the 8YY intercarrier compensation regime. The Order requires price cap and rate-of-return carriers to establish separate rate elements for certain interstate and intrastate toll free and non-toll free services. Carriers are also required to lower their 8YY database query charges over three years, and are prohibited from charging for more than one query per call. Competitive LECs assessing a tariffed intrastate or interstate Toll Free Database Query Charge must cap such charges and revise their tariffs to ensure that those charges do not exceed the rates charged by the competing incumbent LEC.

The information collected through carriers' tariffs is used by the Commission and state commissions to determine whether services offered are just and reasonable, as the Act requires. The tariffs and any supporting documentation are examined in order to determine if the services are offered in a just and reasonable manner.

OMB Control Number: 3060-1198.

Title: Section 90.525, Administration of Interoperability Channels; Section 90.529, State Licenses; and Section 90.531, Band Plan.

Form No.: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: State, local or tribal government, and Not-for-profit institutions.

Number of Respondents and Responses: 2,230 respondents; 2,230 responses.

Estimated Time per Response: 1 hour-2 hours.

Frequency of Response: On occasion reporting and one-time reporting requirements; third party disclosure.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection of information is contained in sections 4(i), 11, 303(g), 303(r), and 332(c)(7) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 161, 303(g), 303(r), 332(c)(7), unless otherwise noted.

Total Annual Burden: 2,230 hours.

Total Annual Cost: No Cost.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality.

Needs and Uses: Section 90.525 of the Commission's rules requires approval of license applications for Interoperability channels in the 769-775 MHz and 799-805 MHz frequency bands by state-level agency or organization responsible for administering emergency communications. Section 90.529 of the Commission's rules provides that each state license will be granted subject to the condition that the state certifies on or before each applicable benchmark date that it is providing or prepared to provide "substantial service." Section 90.531 of the Commission's rules sets forth the band plan for the 769-775 MHz and 799-805 MHz public safety bands. This section covers channel designations for base and mobile use, narrowband segments, combined channels, channel pairing, internal guard band, and broadband. Narrowband general use channels, including the former narrowband reserve channels, and low power channels require regional planning committee concurrence and narrowband air-ground channels require state or regional planning committee concurrence.

Commission staff will use the information to assign licenses for interoperability and General Use channels, as well as renewal of State licenses. The information will also be used to determine whether prospective licensees operate in compliance with the Commission's rules. Without such information, the Commission could not accommodate State interoperability or regional planning requirements or provide for the efficient use of State frequencies. This information collection includes rules to govern the operation and licensing of 700 MHz band systems to ensure that licensees continue to fulfill their statutory responsibilities in accordance with the Communications Act of 1934, as amended. Such information will continue to be used to verify that applicants are legally and technically qualified to hold licenses, and to determine compliance with Commission rules.
