

or functionality and seeks to obtain in-depth feedback from users on the common registration form, additional application requirements, and data reports available.

Estimate of Burden: At present, most education and training opportunities funded by NSF use applications that are submitted directly to each Site, if such applications are required as is the case with the REU Sites program. Sites might run competitive and noncompetitive applications to select their program participants. We estimate that individuals applying for noncompetitive Sites will spend 3.25 hours submitting information through the ETAP system; for competitive Sites, this estimate is 7 hours. We estimate that individuals writing letters of reference for students will spend 0.5 hours drafting a letter in support of a student's application to a competitive Site. We estimate that PIs (or their designated users) will spend 4.7 hours using the system to track and manage applications to their Site.

Respondents: Individuals.

Estimated Number of Respondents: 66,499.

Estimated Total Annual Burden on Respondents: 146,710 hours.

Frequency of Responses: Three rounds of data collection.

Dated: March 26, 2021.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering the approval of the initial and updated DFPs submitted by ISFSI licensees. The NRC staff has prepared a Final EA and FONSI determination for each of the initial and updated ISFSI DFPs in accordance with the NRC regulations in Part 51 of title 10 of the *Code of Federal Regulations* (10 CFR), "Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions," which implement the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*).

The NRC requires its licensees to plan for the eventual decommissioning of their licensed facilities prior to license termination. On June 17, 2011, the NRC published a final rule in the **Federal Register** amending its decommissioning planning regulations (76 FR 35512). The final rule amended the NRC regulation, 10 CFR 72.30, which concerns financial assurance and decommissioning for ISFSIs. This regulation requires each holder of, or applicant for, a license under 10 CFR part 72 to submit a DFP for the NRC's review and approval. The DFP is to demonstrate the licensee's financial assurance, *i.e.*, that funds will be available to decommission the ISFSI. The NRC staff will later publish its financial analyses of the DFP submittals which will be available for public inspection in ADAMS.
