

The stress test results are expected to support ongoing improvement in a covered institution's stress testing practices with respect to its internal assessments of capital adequacy and overall capital planning. The OCC proposed new changes to these templates on January 28, 2021.⁸

The OCC recognizes that many covered institutions with total consolidated assets of \$250 billion or more are required to submit reports using reporting form FR Y-14A.⁹ The OCC also recognizes the Board has proposed and implemented modifications to the FR Y-14A and, to the extent practical, the OCC is keeping its reporting requirements consistent with the Board's FR Y-14A to minimize burden on covered institutions.¹⁰ Therefore, the OCC is revising its reporting requirements to mirror the Board's FR Y-14A for covered institutions with total consolidated assets of \$250 billion or more.

The OCC's changes include updates to various schedules to reflect the adoption of the tailoring framework used to determine the applicability of regulatory capital requirements to large U.S. banking organizations.¹¹ Other changes include removing the worksheet for reporting advanced approaches risk-weighted assets and the worksheet for reporting pre-provision net revenue (PPNR) metrics as well as technical changes to various individual data items. The changes to the OCC's reporting templates do not include data items in the FR Y-14A associated with

several capital buffers related ratios, such as the Board's stress capital buffer requirement adopted in 2020.¹² The changes remove certain items that are collected from Board-regulated institutions but that will not be required from national banks and federal savings associations. The changes remove the OCC Supplemental Schedule, which collects information not collected by the FR Y-14A. While the proposed changes included the deletion of some instructions related to the counterparty default scenario, the final instructions do not include this change. The retention of these instructions is meant to clarify that the requirement to include a counterparty default scenario is not being changed.

The OCC did not receive any comments on the proposed revisions.
Type of Review: Revision.

Affected Public: Businesses or other for-profit.

Estimated Number of Respondents: 8.

Estimated Total Annual Burden: 3,716 hours.

The OCC believes that the systems that covered institutions use to prepare the FR Y-14 reporting templates and submit to the Board will also be used to prepare the reporting templates described in this notice. On January 28, 2021, the OCC published a notice for 60 days of comment concerning this collection, 86 FR 7456. No comments were received. Comments continue to be invited on:

(a) Whether the collection of information is necessary for the proper

performance of the functions of the OCC, including whether the information has practical utility;

(b) The accuracy of the OCC's estimate of the burden of the collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Deputy Chief Counsel, Office of the Comptroller of the Currency.
