

considers FICUs with assets less than \$100 million to be small entities.⁴⁰

As discussed previously, consistent with the APA,⁴¹ the Board has determined for good cause that general notice and opportunity for public comment is unnecessary, and therefore the Board is not issuing a notice of proposed rulemaking. Rules that are exempt from notice and comment procedures are also exempt from the RFA requirements, including conducting a regulatory flexibility analysis, when among other things the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. Accordingly, the Board has concluded that the RFA's requirements relating to initial and final regulatory flexibility analysis do not apply.

Nevertheless, the Board seeks comment on whether, and the extent to which, the interim final rule would affect a significant number of small entities.

List of Subjects in 12 CFR Part 702

Credit unions, Reporting and recordkeeping requirements.

By the NCUA Board.

Melane Conyers-Ausbrooks,

Secretary of the Board.

For the reasons set forth in the preamble, the Board amends 12 CFR part 702 as follows:

PART 702—CAPITAL ADEQUACY

■ 1. The authority citation for part 702 continues to read as follows:

Authority: 12 U.S.C. 1766(a), 1790d.

■ 2. In § 702.201, revise and republish the introductory text of paragraph (b)(2) to read as follows:

§ 702.201 Prompt corrective action for "adequately capitalized" credit unions.

* * * * *

(b) * * *

(2) Notwithstanding paragraph (a) of this section, starting on April 19, 2021 and ending on March 31, 2022, for a credit union that is adequately capitalized:

* * * * *

■ 3. In § 702.206, revise and republish paragraph (c)(4) to read as follows:

§ 702.206 Net worth restoration plans.

* * * * *

(c) * * *

(4) Notwithstanding paragraphs (c)(1), (2), and (3) of this section, the Board may permit a credit union that is

undercapitalized to submit to the Regional Director a streamlined NWRP plan attesting that its reduction in capital was caused by share growth and that such share growth is a temporary condition due to the COVID-19 pandemic. A streamlined NWRP plan is permitted between April 19, 2021 and March 31, 2022.

BILLING CODE 7535-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 29

[Docket No. FAA-2021-0241; Special Conditions No. 29-053-SC]

Special Conditions: Airbus Helicopters Model H160B Helicopter; Use of 30-Minute All Engines Operating Power Rating

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final special conditions; request for comments.

SUMMARY: These special conditions are issued for the Airbus Helicopters (Airbus) Model H160B helicopter. This model helicopter will have a novel or unusual design feature associated with a 30-minute all engines operating (AEO) power rating. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES:

Effective date: The effective date of these special conditions is May 4, 2021.

Comment due date: The FAA must receive your comments by May 19, 2021.

ADDRESSES: Send comments identified by docket number FAA-2021-0241 using any of the following methods:

- **Federal eRegulations Portal:** Go to <http://www.regulations.gov> and follow the online instructions for sending your comments electronically.

- **Mail:** Send comments to Docket Operations, M-30, U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE, Room W12-140, West Building Ground Floor, Washington, DC 20590-0001.

- **Hand Delivery of Courier:** Take comments to Docket Operations in

Room W12-140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

- **Fax:** Fax comments to Docket Operations at 202-493-2251.

Privacy: Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 1.35, the FAA will post all comments it receives, without change, to <http://regulations.gov>, including any personal information the commenter provides. Using the search function of the docket website, anyone can find and read the electronic form of all comments received into any FAA docket, including the name of the individual sending the comment (or signing the comment for an association, business, labor union, etc.). DOT's complete Privacy Act Statement can be found in the **Federal Register** published on April 11, 2000 (65 FR 19477-19478), as well as at <http://DocketsInfo.dot.gov>.

Confidential Business Information: CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to these special conditions contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to these special conditions, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as "PROPIN". The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of these special conditions. Submissions containing CBI should be sent to Rao Edupuganti, Dynamic System Section, AIR-627, Technical Innovation Policy Branch, Policy and Innovation Division, Aircraft Certification Service, 10101 Hillwood Parkway, Fort Worth, TX 76177; telephone (817) 222-5110; email Rao.Edupuganti@faa.gov. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Docket: Background documents or comments received may be read at <http://www.regulations.gov> at any time. Follow the online instructions for accessing the docket, or go to the Docket Operations in Room W12-140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington,

⁴⁰ NCUA IRPS 15-1. 80 FR 57512 (Sept. 24, 2015).

⁴¹ 5 U.S.C. 553(b)(3)(B).

DC, between 9 a.m., and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Rao Edupuganti, Dynamic System Section, AIR-627, Technical Innovation Policy Branch, Policy and Innovation Division, Aircraft Certification Service, 10101 Hillwood Parkway, Fort Worth, TX 76177; telephone (817) 222-5110; email Rao.Edupuganti@faa.gov.

SUPPLEMENTARY INFORMATION:

Reason for No Prior Notice and Comment Before Adoption

The FAA has determined, in accordance with 5 U.S.C. 553(b)(3)(B) and 553(d)(3), that notice and opportunity for prior public comment hereon are unnecessary because substantially identical special conditions have been previously subject to the public comment process in several prior instances, such that the FAA is satisfied that new comments are unlikely. For the same reason, the FAA finds that good cause exists for adopting these special conditions upon issuance. The FAA is requesting comments to allow interested persons to submit views that may not have been submitted in response to the prior opportunities for comment.

Comments Invited

While the FAA did not precede these special conditions with a notice of proposed special conditions, the FAA invites you to send any written relevant data, views, or arguments about this final special condition. Send your comments to an address listed under **ADDRESSES**. Include "Docket No. FAA-2021-0241; Special Conditions No. 29-053-SC" at the beginning of your comments. The most helpful comments reference a specific portion of the special conditions, explain the reason for any recommended change, and include supporting data.

The FAA will consider all comments received by the closing date for comments. The FAA may change these special conditions based on the comments received.

Background

On November 7, 2014, Airbus applied for FAA type certification validation of the Model H160B helicopter. Airbus applied for an extension on November 1, 2016, which is also the date of the updated type certification basis.

The Airbus Model H160B is a 14 CFR part 29 transport category, twin turboshaft engine helicopter. The Airbus Model H160B helicopter has a maximum takeoff weight of 13,436 lbs. It can hold a maximum of 12 passengers and 2 crew on board. The Airbus Model H160B helicopter is a new part 29 helicopter characterized by the integration of composite materials in its airframe construction, five main rotor blades (*i.e.*, blue edge technology), a Fenestron tail rotor, and a Helionix flight deck.

Airbus proposes that the Model H160B helicopter include the use of a novel and unusual design feature, which is a 30-minute AEO power rating. The 30-minute AEO power rating is generally intended to be used for hovering at increased power for search and rescue missions. Title 14 CFR 1.1 defines "rated takeoff power" as limited in use to no more than 5 minutes for takeoff operation. The use of takeoff power for 30 minutes will require special airworthiness standards, known as special conditions, to address the use of this 30-minute AEO rating and its effects on the rotorcraft. These special conditions will add requirements to the existing airworthiness standards in 14 CFR 29.1049 (Hovering cooling test procedures), 29.1305 (Powerplant instruments), and 29.1521 (Powerplant limitations).

Type Certification Basis

Under the provisions of 14 CFR 21.17, Airbus must show that the Model H160B helicopter meets applicable provisions of the regulations as listed below. The Airbus Model H160B type certification basis date is November 1, 2016.

1. 14 CFR part 29, Amendments 29-1 through 29-55, dated January 31, 2012.

2. Equivalent Safety Findings:

(a) Sections 29.1305, 29.1309, 29.1549, Engine Training Mode.

(b) Sections 29.1305, 29.1321(a), 29.1351(d)(1), and 29.1435, Part Time Display of Vehicle Parameters.

(c) Sections 29.1301, 29.1305, 29.1309, 29.1321, 29.1549, Substitution

of Power Index Indicator for required powerplant instruments.

(d) Sections 29.1545(b)(4), 29.1549(b), Airspeed and Powerplant indication green marking.

(e) Section 29.1555(c)(1), Usable fuel capacity marking.

(f) Section 29.807(c), Passenger emergency exits—other than side of fuselage.

In addition, the certification basis includes certain equivalent safety findings that are not relevant to these proposed special conditions.

In addition to the applicable airworthiness regulations and special conditions, the Airbus Model H160B helicopter must comply with the noise certification requirements of 14 CFR part 36, and the FAA must issue a finding of regulatory adequacy under section 611 of Public Law 92-574, the "Noise Control Act of 1972."

Regulatory Basis for Special Conditions

The Administrator has determined that the applicable airworthiness regulations (that is, 14 CFR part 29) do not contain adequate or appropriate safety standards for the Airbus Model H160B helicopter because of a novel or unusual design feature. Therefore, special conditions are prescribed under the provisions of § 21.16.

The FAA issues special conditions, as defined in § 11.19, in accordance with § 11.38, and they become part of the type certification basis under § 21.17(a)(2).

Special conditions are initially applicable to the model for which they are issued. Should the type certificate for that model be amended later to include any other model that incorporates the same or similar novel or unusual design feature, the special conditions would also apply to the other model under § 21.101.

Novel or Unusual Design Features

The Airbus Model H160B helicopter will incorporate the following novel or unusual design feature:

A 30-minute AEO power rating.

Discussion

The following is a summary of the final special conditions:

(a) In addition to the requirements of § 29.1049, the aircraft cooling effects due to the use of the 30-minute AEO power rating versus the Takeoff (five-minute) rating must be accounted for in the testing.

(b) In addition to the requirements of § 29.1305, since this new 30-minute AEO power rating has a time limit associated with its use, the pilot must have the means to identify:

(1) When the rated engine power level is achieved,
 (2) when the event begins,
 (3) when the time interval expires, and
 (4) when the cumulative time in one flight is reached.

(c) In addition to the requirements of § 29.1521, this new 30-minute AEO power rating must be limited to not more than 30 minutes per use and not more than a 50 minute cumulative time per flight. This new rating will allow the use of power above maximum continuous power (MCP) up to 30 minutes.

(d) Furthermore, the rotorcraft flight manual for the Airbus Model H160B helicopter must include limitations on the use of the 30-minute AEO power rating, which state that continuous use above MCP up to take-off power is limited to 30 minutes.

Applicability

As discussed above, these special conditions are applicable to the Airbus Model H160B helicopter. Should Airbus apply at a later date for a change to the type certificate to include another model incorporating the same novel or unusual design feature, these special conditions would apply to that model as well.

Conclusion

This action affects only a certain novel or unusual design feature on the Airbus Model H160B helicopter. It is not a rule of general applicability.

List of Subjects in 14 CFR Part 29

Aircraft, Aviation safety, Reporting and recordkeeping requirements.

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40113, 44701–44702, 44704.

The Special Conditions

■ Accordingly, pursuant to the authority delegated to me by the Administrator, the following special conditions are issued as part of the type certification basis for the Airbus Helicopters Model H160B helicopter. Unless stated otherwise, all requirements in §§ 29.1049, 29.1305, and 29.1521 remain unchanged.

1. *Section 29.1049, Hovering cooling test procedures.* In addition to the requirements of this section, for rotorcraft with a 30-minute all engines operating (AEO) power rating, the hovering cooling provisions at the 30-minute AEO power rating must be shown—

a. At maximum weight or at the greatest weight at which the rotorcraft

can hover (if less), at sea level, with the power required to hover but not more than the 30-minute power, in the ground effect in still air, until at least five minutes after the occurrence of the highest temperature recorded, or until the continuous time limit of the 30-minute AEO power rating if the highest temperature recorded is not stabilized before.

b. At maximum weight and at the altitude resulting in zero rate of climb for this configuration, until at least five minutes after the occurrence of the highest temperature recorded, or until the continuous time limit of the 30-minute AEO power rating if the highest temperature recorded is not stabilized before.

2. *Section 29.1305 Powerplant instruments, at Amendment 29–40.* In addition to the requirements of this section, for rotorcraft with a 30-minute AEO power rating, a means must be provided to alert the pilot when the engine is at the 30-minute power level, when the event begins, when the time interval expires, and when the cumulative time in one flight is reached.

3. *Section 29.1521 Powerplant limitations, at Amendment 29–41.* In addition to the requirements of this section, the use of the 30-minute AEO power rating must be limited to not more than 30 minutes per use and not more than a 50 minute cumulative time per flight. The use of the 30-minute power must also be limited by:

a. The maximum rotational speed which may not be greater than—

(1) The maximum value determined by the rotor design; or

(2) The maximum value shown during the type tests;

b. The maximum allowable turbine inlet or turbine outlet gas temperature.

c. The maximum allowable power or torque for each engine, considering the power input limitations of the transmission with all engines operating;

d. The time limit for the use of the power corresponding to the limitations established in this section, subparagraphs a. through c. of this section; and

e. The maximum allowable engine and transmission oil temperatures.

Issued in Kansas City, Missouri on April 14, 2021.

Patrick R. Mullen,

Manager, Technical Innovation Policy Branch, Policy and Innovation Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2021–0313; Project Identifier MCAI–2021–00348–T; Amendment 39–21516; AD 2021–09–03]

RIN 2120–AA64

Airworthiness Directives; Airbus Canada Limited Partnership (Type Certificate Previously Held by C Series Aircraft Limited Partnership (CSALP); Bombardier, Inc.) Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain Airbus Canada Limited Partnership Model BD–500–1A10 and BD–500–1A11 airplanes. This AD was prompted by reports of the failure of emergency locator transmitter (ELT) antennas. This AD requires repetitive replacements of the ELT antenna and repetitive inspections for damage of the exterior fuselage skin around the ELT antenna attachment area, as specified in a Transport Canada Civil Aviation (TCCA) AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD becomes effective May 4, 2021.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of May 4, 2021.

The FAA must receive comments on this AD by June 3, 2021.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to <https://www.regulations.gov>. Follow the instructions for submitting comments.

- *Fax:* 202–493–2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For material incorporated by reference (IBR) in this AD, contact TCCA, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888–663–3639; email AD-
