

such as bombers, tankers, and fighters. The DAF considered other locations on Andersen AFB for construction of infrastructure upgrades; however, only the Proposed Action locations were determined to meet the criteria for the infrastructure upgrades. The No Action Alternative will be addressed in the EIS as well.

Additional review and consultation which will be incorporated into the preparation of the Draft EIS will include, but are not necessarily limited to, consultation under Section 7 of the Endangered Species Act and consultation under Section 106 of the National Historic Preservation Act. The DAF will conduct cultural and natural resources surveys in the areas proposed for upgrades and consult with appropriate resource agencies to determine the potential for significant impacts on those resources. During construction, the DAF anticipates an increased demand on the construction workforce and an increase in local spending. Currently, no other short- or long-term notable impacts are anticipated. Additional analysis will be provided in the Draft EIS.

*Scoping and Agency Coordination:* To effectively define the full range of issues to be evaluated in the EIS, the Air Force will determine the scope of the analysis by soliciting comments from interested local, territorial, and federal elected officials and agencies, as well as interested members of the public and others. Comments are requested on potential alternatives and impacts, and identification of any relevant information, studies, or analyses of any kind concerning impacts affecting the quality of the human environment. Concurrent with the publication of this notice of intent, public scoping notices will be announced locally. In response to the coronavirus (COVID-19) pandemic in the United States and the Center for Disease Control's recommendations for social distancing and avoiding large public gatherings, the DAF will not hold in-person public scoping meetings. Public scoping will instead be accomplished remotely, in accordance with the 2020 version of 40 CFR 1506.6, via the project website at [www.AAFBInfrastructureEIS.com](http://www.AAFBInfrastructureEIS.com). The website provides posters, a presentation, an informational brochure, in English and Chamorro, other meeting materials, and the capability for the public to provide public scoping comments. Scoping materials are also available in print at the Nieves M. Flores Memorial

Library (254 Martyr Street, Hagåtña, Guam).

[Docket No. CP15–17–000]

#### Sabal Trail Transmission, LLC; Notice of Request for Extension of Time

Take notice that on April 7, 2021, Sabal Trail Transmission, LLC (Sabal Trail) requested that the Federal Energy Regulatory Commission (Commission) grant an extension of time, until May 1, 2023, to install two compressor units needed to complete Phase III of its Sabal Trail Project, as authorized in the February 2, 2016 Order Issuing Certificates and Approving Abandonment (February 2 Order).<sup>1</sup>

<sup>1</sup> *Florida Southeast Connection, LLC, et al.*, 154 FERC ¶ 61,080 (2016) (February 2 Order), *order on*

Ordering Paragraph (F)(1) of the February 2 Order, as amended, provides a deadline of May 1, 2021, for Sabal Trail to install these remaining two compressor units and make them available for service.<sup>2</sup>

Sabal Trail states that, due to unforeseen delays in reaching full commercialization of the project, additional time is now required in order to complete the construction of the authorized project facilities.

This notice establishes a 15-calendar day intervention and comment period deadline. Any person wishing to comment on the applicant's request for an extension of time may do so. No reply comments or answers will be considered. If you wish to obtain legal status by becoming a party to the proceedings for this request, you should, on or before the comment date stated below, file a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10).<sup>3</sup>

As a matter of practice, the Commission itself generally acts on requests for extensions of time to complete construction for Natural Gas Act facilities when such requests are contested before order issuance. For those extension requests that are contested,<sup>4</sup> the Commission will aim to issue an order acting on the request within 45 days.<sup>5</sup> The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension.<sup>6</sup> The Commission will not consider arguments that re-litigate the issuance of the certificate order, including whether the Commission properly found the project to be in the public convenience and necessity and whether the Commission's environmental analysis for the certificate complied with the National Environmental Policy Act.<sup>7</sup> At the time
