

a comprehensive analysis on at least a monthly basis of its existing stress testing scenarios, models, and underlying parameters and assumptions, and considers modifications to ensure they are appropriate for determining its required level of default protection in light of current and evolving market conditions. Thus, the Commission finds that these aspects of the proposed rule change are consistent with Rule 17Ad-22(e)(4)(vi)(B).<sup>35</sup>

#### *E. Consistency With Rule 17Ad-22(e)(6)(i)*

Rule 17Ad-22(e)(6)(i) requires that ICE Clear Europe establish, implement, maintain and enforce written policies and procedures reasonably designed to cover its credit exposures to its participants by establishing a risk-based margin system that, at a minimum, considers, and produces margin levels commensurate with, the risks and particular attributes of each relevant product, portfolio, and market.<sup>36</sup> As discussed above, the Commission believes the proposed rule change should improve ICE Clear Europe's Risk Methodology Description by, among other things, clarifying components of the initial margin methodology. Through application of its risk model, as described in the Risk Methodology Description, ICE Clear Europe produces initial margin requirements commensurate with, the risks and particular attributes of each relevant product, portfolio, and market. Thus, the Commission finds that this aspect of the proposed rule change is consistent with Rule 17Ad-22(e)(6)(i).<sup>37</sup>

#### *F. Consistency With Rule 17Ad-22(e)(6)(iv)*

Rule 17Ad-22(e)(6)(iv) requires that ICE Clear Europe establish, implement, maintain and enforce written policies and procedures reasonably designed to cover its credit exposures to its participants by establishing a risk-based margin system that, at a minimum, uses reliable sources of timely price data and uses procedures and sound valuation models for addressing circumstances in which pricing data are not readily available or reliable.<sup>38</sup> As discussed above, the Commission believes that the changes to the Price Discovery Policy should consolidate and clarify the process that ICE Clear Europe would use to determine prices for a particular instrument or risk sub-factor when

fewer than three Clearing Members have open interest in that instrument or risk sub-factor and therefore should improve ICE Clear Europe's ability to derive reliable prices for instruments and sub-risk factors even where only a few Clearing Members have open interest. In addition, the updated references and defined terms should improve clarity and reduce the possibility for error in applying the Price Discovery Policy.

Moreover, as discussed above, the Commission believes the proposed rule change should improve ICE Clear Europe's Risk Methodology Description by outlining the steps ICE Clear Europe would take if end-of-day prices were not available from the usual sources, such as when clearing a new product without a long history of trading, and providing a description of the collection, analysis, and back-testing of relevant pricing data for new products.

The Commission believes that both of these aspects of the proposed rule change—the changes to the Price Discovery Policy and the changes to the Risk Methodology Description—should help to ensure that ICE Clear Europe collects, and uses, reliable and timely price data. Moreover, the Commission believes that the procedures outlined in the Price Discovery Policy should help to address the situation where such data are not available because too few Clearing Members have open interest. The Commission similarly believes that procedures outlined in the Risk Methodology Description should help to address the situation where such data are not available, such as when clearing a new product without a long history of trading.

Thus, the Commission finds that these aspects of the proposed rule change are consistent with Rule 17Ad-22(e)(6)(iv).<sup>39</sup>

#### *G. Consistency With Rule 17Ad-22(e)(6)(vi)(B)*

Rule 17Ad-22(e)(6)(vi)(B) requires that ICE Clear Europe establish, implement, maintain and enforce written policies and procedures reasonably designed to cover its credit exposures to its participants by establishing a risk-based margin system that, at a minimum, is monitored by management on an ongoing basis and is regularly reviewed, tested, and verified by conducting a sensitivity analysis of its margin model and a review of its parameters and assumptions for backtesting on at least a monthly basis, and considering modifications to ensure the backtesting practices are appropriate for determining the adequacy of ICE

Clear Europe's margin resources.<sup>40</sup> As discussed above, the Parameters Review Procedures would require that ICE Clear Europe, on a monthly basis, calibrate and review the parameters that underlie the risk model and analyze the sensitivity of the risk model to changes in certain parameters. Thus, the Commission finds that this aspect of the proposed rule change is consistent with Rule 17Ad-22(e)(6)(vi)(B).<sup>41</sup>

#### **IV. Conclusion**

On the basis of the foregoing, the Commission finds that the proposed rule change is consistent with the requirements of the Act, and in particular, with the requirements of Section 17A(b)(3)(F) of the Act<sup>42</sup> and Rules 17Ad-22(e)(4)(ii), (e)(4)(vi)(A), (e)(4)(vi)(B), (e)(6)(i), (e)(6)(iv), and (e)(6)(vi)(B).<sup>43</sup>

*It is therefore ordered* pursuant to Section 19(b)(2) of the Act<sup>44</sup> that the proposed rule change (SR-ICEEU-2021-006), be, and hereby is, approved.<sup>45</sup>

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>46</sup>
