- In Section VIII, additional instructions to help developers name and reference their attachments throughout the submission form.

- In Section IX, additional instructions to help developers name and reference their attachments throughout the submission form.

These updates were made based on FNS' own findings and feedback from users since the forms' introduction in 2018. FNS has refined and streamlined where real-world use has indicated this is possible, and included additional instructions, questions, or opportunities for response where users, trainers, and FNS partners indicated areas for improvement. FNS has also made small wording changes to fix typos and improve readability. Overall, the

changes to the form are focused on quality-of-life improvements and burden reductions for the end user. In small-scale pilot testing, users completed the revised FNS-885 approximately one hour sooner and the revised FNS-886 approximately took one hour longer. As indicated in the table below, these proposed revisions reduce Annual Burden on the public from 668 hours to 523 hours.

Affected Public: SNAP-Ed State and Implementing agencies, such as extension universities, non-profit organizations, and local program operators. Intervention developers may be members of these organizations, academic institutions not associated with SNAP-Ed, non-profit organizations, and private organizations who voluntarily complete the Intervention

Submission Form. Members of FNS SNAP-Ed staff, NCCOR and ASNNA members can voluntarily review interventions using the Intervention Scoring Tool.

Estimated Number of Respondents: We estimate 127 respondents.

Estimated Number of Responses per Respondent: 1 (Intervention Submission form), 2 (Intervention Scoring Tool).

Estimated Total Annual Responses: 160.

Estimated Time per Response: 120 Minutes (Intervention Submission Form), 360 Minutes (Intervention Scoring Tool).

Estimated Total Annual Burden on Respondents: 31,380 minutes (523 hours). See the table below for estimated total annual burden for each type of respondent.

DEPARTMENT OF COMMERCE

U.S. Census Bureau

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Manufacturers' Unfilled Orders Survey

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on February 17, 2021 during a 60-day comment period.

This notice allows for an additional 30 days for public comments.

Agency: U.S. Census Bureau.

Title: Manufacturers' Unfilled Orders Survey.

OMB Control Number: 0607-0561.

Form Number(s): MA-3000.

Type of Request: Regular submission, Request for an Extension, without Change, of a Currently Approved Collection.

Number of Respondents: 6,000.

Average Hours per Response: 30 minutes.

Burden Hours: 3,000.

Needs and Uses: The data collected in the Manufacturers' Unfilled Orders (M3UFO) Survey will be used to benchmark the new and unfilled orders information published in the monthly Manufacturers' Shipments, Inventories, and Orders (M3) Survey. The M3 Survey collects monthly data on the value of shipments, inventories, and new and unfilled orders from manufacturing companies. The orders, as well as the shipments and inventory data, are valuable tools for analysts of business cycle conditions. The data are used by the Bureau of Economic Analysis, the Council of Economic Advisers, the Federal Reserve Board, the Conference Board, as well as businesses, trade associations, and the media.

The monthly M3 Survey estimates are based on a panel of approximately 5,000 reporting units that represent approximately 3,100 companies and provide an indication of month-to-month change for the Manufacturing Sector. These reporting units may be divisions of diversified large companies, large homogenous companies, or single-unit manufacturers. The M3 estimates are periodically benchmarked to comprehensive data on the manufacturing sector from the Annual Survey of Manufactures (ASM), the Economic Census (shipments and inventories) and the M3UFO Survey, which is the subject of this notice. To obtain more accurate M3 estimates of unfilled orders, which are also used in deriving M3 estimates of new orders, we conduct the M3UFO Survey annually to be used as the source for benchmarking M3 unfilled orders data.

Additionally, the M3UFO data are used to determine which North American Industry Classification System (NAICS) industries continue to maintain unfilled orders; this is done in order to minimize burden on businesses by only requesting unfilled orders as part of the monthly M3 Survey for industries that still maintain unfilled orders.

Unfilled orders data are not currently collected in the ASM or the Economic
