**FOR FURTHER INFORMATION CONTACT:**

Seleda Perryman or Theda Kenney, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor; telephone (202) 693-2222.

**SUPPLEMENTARY INFORMATION:**

#### I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing collection of information in accordance with the Paperwork Reduction Act (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The Standard protects workers from the adverse health effects that may result from their exposure to methylene chloride (MC). The requirements in the Standard include worker exposure monitoring, notifying workers of their MC exposures, administering medical examinations to workers, providing examining physicians with specific program and worker information, ensuring that workers receive a copy of their medical examination results, maintaining workers' exposure monitoring and medical examination

records for specific periods, and providing access to these records by OSHA, the National Institute for Occupational Safety and Health, the affected workers, and their authorized representatives.

#### II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

#### III. Proposed Actions

The agency is requesting an adjustment increase in the number of burden hours from 56,276 to 61,814.83 hours (a total increase of 5,538.83 hours). The increase is a result the agency's estimate, based on updated data, that the number of establishments and workers affected by the Standard has increased.

*Type of Review:* Extension of a currently approved collection.

*Title:* Methylene Chloride (29 CFR part 1910.1052).

*OMB Control Number:* 1218-0179.

*Affected Public:* Business or other for-profits.

*Number of Respondents:* 84,595.

*Frequency of Responses:* On occasion.

*Total Responses:* 236,462.

*Average Time per Response:*

Annually; semi-annually; quarterly; on occasion.

*Estimated Total Burden Hours:* 61,814.83.

*Estimated Cost (Operation and Maintenance):* \$20,375,527.20.
