The COP proposes the construction and

operation of a wind energy facility offshore Rhode Island with export cables connecting to the onshore electric grid in North Kingstown, Rhode Island. This notice of intent (NOI) announces the EIS scoping process for the Revolution Wind COP. Additionally, this NOI seeks public comment and input under section 106 of the National Historic Preservation Act (NHPA) and its implementing regulations. Detailed information about the proposed wind energy facility, including the COP, can be found on BOEM’s website at: www.boem.gov/Revolution-Wind.

SUPPLEMENTARY INFORMATION:

Purpose and Need for the Proposed Action

In Executive Order 14008, President Biden stated that it is the policy of the United States “to organize and deploy the full capacity of its agencies to combat the climate crisis to implement a Government-wide approach that reduces climate pollution in every sector of the economy; increases resilience to the impacts of climate change; protects public health; conserves our lands, waters, and biodiversity; delivers environmental justice; and spurs well-paying union jobs and economic growth, especially through innovation, commercialization, and deployment of clean energy technologies and infrastructure.”

Through a competitive leasing process under 30 CFR 585.211, Revolution Wind was awarded Commercial Lease OCS–A 0486 covering an area offshore Rhode Island (the Lease Area). Revolution Wind has the exclusive right to submit a COP for activities within the Lease Area, and it has submitted a COP to BOEM proposing the construction and installation, operations and maintenance, and conceptual decommissioning of an offshore wind energy facility in the Lease Area (the Project).

The goal of Revolution Wind is to develop a commercial-scale, offshore wind energy facility in the Lease Area with up to 100 wind turbine generators, inter-array cables, up to two offshore substations, and two transmission cables making landfall in North Kingstown, Rhode Island. The Project would contribute to Connecticut’s mandate of 2,000 megawatts (MW) of offshore wind energy by 2030, as outlined in Connecticut Public Act 19–71, and Rhode Island’s 100 percent renewable energy goal by 2030, as outlined in the Rhode Island Governor’s Executive Order 20–01 of January 2020. Furthermore, Revolution Wind’s goal to construct and operate a commercial-scale, offshore wind energy facility in the Lease Area is intended to fulfill the following three power purchase agreements (PPAs): (1) A 200–MW contract with the State of Connecticut approved in January 2019; (2) a 400–MW contract with the State of Rhode Island approved in June 2019; and (3) a 104–MW contract with the State of Connecticut approved in December 2019.

Based on the goals of the applicant and BOEM’s authority, the purpose of BOEM’s action is to respond to Revolution Wind’s COP proposal and determine whether to approve, approve with modifications, or disapprove Revolution Wind’s COP to construct and install, operate and maintain, and decommission a commercial-scale, offshore wind energy facility within the Lease Area (the Proposed Action). BOEM’s action is needed to further the United States’ policy to make Outer Continental Shelf (OCS) energy resources available for expeditious and orderly development, subject to environmental safeguards (43 U.S.C. 1332(3)), including consideration of natural resources, safety of navigation, and existing ocean uses.

In addition, the National Oceanic and Atmospheric Administration’s (NOAA) National Marine Fisheries Service (NMFS) anticipates receipt of one or more requests for authorization to take marine mammals incidental to activities
