

paying for private health insurance coverage, under provisions of the Patient Protection and Affordable Care Act. In this matching program, OPM provides CMS with monthly data identifying each active federal employee's status as enrolled in or eligible for coverage under an OPM Health Benefit Plan, and an annual premium spread index file identifying the lowest premium available to a federal employee in each of 32 premium localities. CMS and AEs use the OPM data to verify whether an individual who is applying for or is enrolled in private health insurance coverage under a qualified health plan through a federally-facilitated or state-based health insurance exchange is eligible for coverage under an OPM health benefit plan, for the purpose of determining if the individual is eligible for financial assistance (including an advance tax credit and cost sharing reduction, which are types of insurance affordability programs) in paying for the private coverage. OPM health benefit plans provide minimum essential coverage, and eligibility for such plans precludes eligibility for financial assistance in paying for private coverage.
