

complaints from viewers unable to receive an over-the-air signal, despite being able to receive signals from other stations. In addition, the Petitioner submitted an analysis, using the Commission's *TVStudy* software analysis program, demonstrating that the proposed channel change from channel 7 to 15 would result in a minimal loss of service to only 299 people currently predicted to receive KRCR's signal. In addition, the Petitioner states that KRCR's proposed channel 15 facility is predicted to serve a total of 517,605 people, a net gain of 30,175 potential viewers over the existing KRCR channel 7 licensed facility.

[MB Docket No. 21-155; RM-11900; DA 21-436; FR ID 22597]

Television Broadcasting Services Medford, Oregon

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission has before it a petition for rulemaking filed by KTVL Licensee, LLC (Petitioner), the licensee of KTVL (CBS), channel 10, Medford, Oregon. The Petitioner requests the substitution of channel 16 for channel 10 at Medford, Oregon in the DTV Table of Allotments.

DATES: Comments must be filed on or before June 11, 2021 and reply comments on or before June 28, 2021.

ADDRESSES: Federal Communications Commission, Office of the Secretary, 45

L Street NE, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve counsel for the Petitioner as follows: Paul A. Cicelski, Esq., Lerman Senter, PLLC, 2001 L Street NW, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Andrew Manley, Media Bureau, at (202) 418-0596; or Andrew Manley, Media Bureau, at Andrew.Manley@fcc.gov.

SUPPLEMENTARY INFORMATION: In support of its channel substitution request, the Petitioner states that the reception of VHF signals require larger antennas relative to UHF channels, and that studies suggest a large variability in indoor antennas, with most receiving fairly well at UHF and the substantial majority not so well to very poor for high-VHF channels. Petitioner further states that KTVL has received numerous complaints from viewers unable to receive that Station's over-the-air signal, despite being able to receive signals from other stations. In its Amended Engineering Exhibit, the Petitioner demonstrated that while the proposed channel 16 noise limited contour does not completely encompass the channel 10 noise limited contour, there are three other CBS affiliated stations that serve all but 9,355 persons in the noise limited contour loss area. The Petitioner also submitted an analysis, using the Commission's *TVStudy* software analysis program, demonstrating that after taking into account service provided by other CBS stations, all of the population located within KTVL's channel 10 noise limited contour will continue to receive CBS service, resulting in no loss of network service.
