

Basis for Taking Action

NCRWQCB conducted initial investigations at the Site and found that both the soil and groundwater were contaminated with various herbicides, pesticides, and volatile and semi-volatile organic compounds and chromium. The specific COCs identified were 1,2-DCP and 2,4-dichlorophenoxyacetic acid (2,4-D). Soil contamination was detected to a depth of 15 feet but was contained to an on-site sump of 15 feet by 20 feet. At the time, the groundwater contaminant plume was estimated to extend approximately 170 feet to the southeast of the sump, in the direction of groundwater movement. If the contaminated aquifer were to be used as a drinking water supply, it would pose a significant health risk. Ingestion of these contaminants has been linked to increased cancer risk. Investigations indicated that elevated levels of chromium were also present at the Site.

Original Remedy Selection

In 1985, the EPA selected a remedy in a ROD to address the soil and groundwater contamination at the Site. The major components of the Selected Remedy included: Excavation and off-site disposal of contaminated soils; extraction and treatment of groundwater through carbon adsorption and coagulation/filtration treatment; disposal of treated groundwater to the Crescent City Wastewater Treatment Plant; and groundwater monitoring.

Actions Taken Following ROD Issuance

The 1989 ESD explained that because the chromium at the Site was determined to be naturally-occurring, it could not be remedied under CERCLA, pursuant to 42 U.S.C. 104(a)(3)(A). The ESD also documented and justified a change in the groundwater treatment method from carbon adsorption and coagulation/filtration to air sparging.

The EPA issued a ROD Amendment in 2000 that revised the remedy, because the Site RAO of restoring the contaminated groundwater to the drinking water standard for 1,2-DCP could not be met, because no technology existed that was capable of reaching the 10 micrograms per liter ($\mu\text{g/L}$) level set out in the ROD. Notably, this applied as well to the Maximum Contaminant Level (MCL) of $5 \mu\text{g/L}$ that had since been adopted since the cleanup level had been selected for the Site. In light of the inability to reach these cleanup levels, the ROD Amendment's revised remedy instead sought to contain the groundwater contamination through natural attenuation and monitoring and

prevent its use as drinking water for as long as contaminant concentrations exceeded drinking water quality standards. The ROD Amendment identified the new ARAR for 1,2-DCP (equivalent to the new MCL of $5 \mu\text{g/L}$); adopted a TI waiver of the newly identified ARAR for groundwater within the existing contaminated area where 1,2-DCP exceeded $5 \mu\text{g/L}$; and required semi-annual groundwater monitoring and the enactment of institutional controls (ICs) to prevent exposure to contaminated groundwater.

In 2002, the EPA, DTSC, and Del Norte County entered into a Consent Decree, and in doing so, Del Norte County agreed to carry out and finance continued remediation efforts at the Site, including monitoring groundwater and implementing ICs in accordance with Site decision documents and plans. Also, in that same year, because all response actions required under CERCLA had been completed, except for ongoing operation and maintenance and Five-Year Reviews, following a 30-day public comment period, the EPA deleted the Site from the NPL.

Basis for ESD

Nearly 20 years after issuance of the TI waiver for 1,2-DCP, groundwater data from the Site consistently demonstrate that concentrations of 1,2-DCP have significantly decreased and are now below the drinking water standard of $5 \mu\text{g/L}$. Given the effectiveness of natural attenuation in lowering concentrations of 1,2-DCP in Site groundwater to meet the MCL, the TI waiver adopted in the 2000 ROD Amendment is no longer necessary. Through this ESD, the EPA is removing the TI waiver for 1,2-DCP and reinstating the 1,2-DCP ARAR. The ESD also reinstates the original RAO that sought to clean up contaminated groundwater to meet drinking water standards. Cleanup under CERCLA is considered complete, although groundwater monitoring is currently ongoing at the Site under state oversight, and EPA plans to continue the Five-Year Review process as required until such time that groundwater attainment is formally achieved.

Enrique Manzanilla,

Director, Superfund Division, U.S. EPA,
Region 9.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPPT-2021-0068; FRL-10024-18]

Certain New Chemicals; Receipt and Status Information for April 2021

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is required under the Toxic Substances Control Act (TSCA), as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act, to make information publicly available and to publish information in the **Federal Register** pertaining to submissions under TSCA Section 5, including notice of receipt of a Premanufacture notice (PMN), Significant New Use Notice (SNUN) or Microbial Commercial Activity Notice (MCAN), including an amended notice or test information; an exemption application (Biotech exemption); an application for a test marketing exemption (TME), both pending and/or concluded; a notice of commencement (NOC) of manufacture (including import) for new chemical substances; and a periodic status report on new chemical substances that are currently under EPA review or have recently concluded review. This document covers the period from 04/01/2021 to 04/30/2021.

DATES: Comments identified by the specific case number provided in this document must be received on or before June 18, 2021.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPPT-2021-0068, and the specific case number for the chemical substance related to your comment, by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

- *Mail:* Document Control Office (7407M), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001.

- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.html>.

Additional instructions on commenting or visiting the docket,

along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT:

For technical information contact: Jim Rahai, Project Management and Operations Division (7407M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001; telephone number: (202) 564-8593; email address: rahai.jim@epa.gov.

For general information contact: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554-1404; email address: TSCA-Hotline@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. What action is the Agency taking?

This document provides the receipt and status reports for the period from 04/01/2021 to 04/30/2021. The Agency is providing notice of receipt of PMNs, SNUNs and MCANs (including amended notices and test information); an exemption application under 40 CFR part 725 (Biotech exemption); TMEs, both pending and/or concluded; NOCs to manufacture a new chemical substance; and a periodic status report on new chemical substances that are currently under EPA review or have recently concluded review.

EPA is also providing information on its website about cases reviewed under the amended TSCA, including the section 5 PMN/SNUN/MCAN and exemption notices received, the date of receipt, the final EPA determination on the notice, and the effective date of EPA's determination for PMN/SNUN/MCAN notices on its website at: <https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca/status-pre-manufacture-notices>. This information is updated on a weekly basis.

B. What is the Agency's authority for taking this action?

Under the Toxic Substances Control Act (TSCA), 15 U.S.C. 2601 *et seq.*, a chemical substance may be either an "existing" chemical substance or a "new" chemical substance. Any chemical substance that is not on EPA's TSCA Inventory of Chemical Substances (TSCA Inventory) is classified as a "new chemical substance," while a chemical substance that is listed on the TSCA Inventory is classified as an "existing chemical substance." (See TSCA section 3(11).) For more information about the

TSCA Inventory please go to: <https://www.epa.gov/tsca-inventory>.

Any person who intends to manufacture (including import) a new chemical substance for a non-exempt commercial purpose, or to manufacture or process a chemical substance in a non-exempt manner for a use that EPA has determined is a significant new use, is required by TSCA section 5 to provide EPA with a PMN, MCAN or SNUN, as appropriate, before initiating the activity. EPA will review the notice, make a risk determination on the chemical substance or significant new use, and take appropriate action as described in TSCA section 5(a)(3).

TSCA section 5(h)(1) authorizes EPA to allow persons, upon application and under appropriate restrictions, to manufacture or process a new chemical substance, or a chemical substance subject to a significant new use rule (SNUR) issued under TSCA section 5(a)(2), for "test marketing" purposes, upon a showing that the manufacture, processing, distribution in commerce, use, and disposal of the chemical will not present an unreasonable risk of injury to health or the environment. This is referred to as a test marketing exemption, or TME. For more information about the requirements applicable to a new chemical go to: <http://www.epa.gov/oppt/newchems>.

Under TSCA sections 5 and 8 and EPA regulations, EPA is required to publish in the **Federal Register** certain information, including notice of receipt of a PMN/SNUN/MCAN (including amended notices and test information); an exemption application under 40 CFR part 725 (biotech exemption); an application for a TME, both pending and/or concluded; NOCs to manufacture a new chemical substance; and a periodic status report on the new chemical substances that are currently under EPA review or have recently concluded review.

C. Does this action apply to me?

This action provides information that is directed to the public in general.

D. Does this action have any incremental economic impacts or paperwork burdens?

No.

E. What should I consider as I prepare my comments for EPA?

1. *Submitting confidential business information (CBI).* Do not submit this information to EPA through regulations.gov or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that

you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at <http://www.epa.gov/dockets/comments.html>.

II. Status Reports

In the past, EPA has published individual notices reflecting the status of TSCA section 5 filings received, pending or concluded. In 1995, the Agency modified its approach and streamlined the information published in the **Federal Register** after providing notice of such changes to the public and an opportunity to comment (see the **Federal Register** of May 12, 1995 (60 FR 25798) (FRL-4942-7). Since the passage of the Lautenberg amendments to TSCA in 2016, public interest in information on the status of section 5 cases under EPA review and, in particular, the final determination of such cases, has increased. In an effort to be responsive to the regulated community, the users of this information, and the general public, to comply with the requirements of TSCA, to conserve EPA resources and to streamline the process and make it more timely, EPA is providing information on its website about cases reviewed under the amended TSCA, including the section 5 PMN/SNUN/MCAN and exemption notices received, the date of receipt, the final EPA determination on the notice, and the effective date of EPA's determination for PMN/SNUN/MCAN notices on its website at: <https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca/status-pre-manufacture-notices>. This information is updated on a weekly basis.

III. Receipt Reports

For the PMN/SNUN/MCANs that have passed an initial screening by EPA during this period, Table I provides the following information (to the extent that such information is not subject to a CBI claim) on the notices screened by EPA during this period: The EPA case number assigned to the notice that indicates whether the submission is an initial submission, or an amendment, a

notation of which version was received, the date the notice was received by EPA, the submitting manufacturer (*i.e.*, domestic producer or importer), the potential uses identified by the manufacturer in the notice, and the chemical substance identity.

As used in each of the tables in this unit, (S) indicates that the information in the table is the specific information provided by the submitter, and (G)

indicates that this information in the table is generic information because the specific information provided by the submitter was claimed as CBI. Submissions which are initial submissions will not have a letter following the case number. Submissions which are amendments to previous submissions will have a case number followed by the letter "A" (*e.g.*, P-18-1234A). The version column designates

submissions in sequence as "1", "2", "3", etc. Note that in some cases, an initial submission is not numbered as version 1; this is because earlier version(s) were rejected as incomplete or invalid submissions. Note also that future versions of the following tables may adjust slightly as the Agency works to automate population of the data in the tables.

TABLE I—PMN/SNUN/MCANS APPROVED * FROM 04/01/2021 TO 04/30/2021

Case No.	Version	Received date	Manufacturer	Use	Chemical substance
J-21-0012	1	03/31/2021	Vestaron corporation	(G) Production of an agricultural product	(G) Yeast that has been stably modified for the production of an agricultural product.
J-21-0013	1	04/02/2021	Vestaron corporation	(G) Production of an agricultural product	(G) Yeast that has been stably modified for the production of an agricultural product.
P-18-0293A	10	04/12/2021	Sirrus, Inc	(S) Intermediate: Monomer used as a chemical intermediate in the manufacture of polymers substance, industrial coatings (<i>e.g.</i> , protective floor coatings) is not used in spray applications, adhesives (<i>e.g.</i> , reactive, industrial structural adhesives or lamination) applied from a liquid form (not aerosol or spray) as a bead or film and are applied via static mixer, roller, brush, roll coater, or squeegee.	(S) Propanedioic acid, 2-methylene-, 1,3-dihexyl ester.
P-18-0294A	10	04/12/2021	Sirrus, Inc	(S) Monomer used as a chemical intermediate in the manufacture of polymers. The PMN substance is loaded into the polymerization equipment and is consumed during the polymerization process—no inhalation exposure is expected during transfer and polymerization. After incorporation into the polymer, there is no worker exposure to the PMN substance.	(S) Propanedioic acid, 2-methylene-, 1,3-dicyclohexyl ester.
P-18-0353A	3	04/13/2021	CBI	(G) Adhesive	(G) Phenolic resin, alkali, polymer with acetone-phenol reaction products, formaldehyde and phenol, sodium salts.
P-18-0354A	3	04/13/2021	CBI	(G) Adhesive	(G) Phenolic resin, alkali, polymer with acetone-phenol reaction products, formaldehyde and phenol, potassium salts.
P-20-0001A	7	04/05/2021	Santolubes Manufacturing, LLC.	(S) Synthetic engine, gear & lubricating oils & greases.	(S) Poly(oxy-1,4-butanediyl), alpha-(1-oxononyl)-omega-[(1-oxononyloxy)-].
P-20-0050	4	04/07/2021	CBI	(G) Additive in consumer products	(S) Benzenepentanol, alpha, gamma-dimethyl-.
P-20-0093A	4	04/06/2021	Ashland, Inc	(G) Coating	(G) Alkanoic acid, 3-heteroatom substituted-2-(heteroatom-substituted alkyl)-2-alkyl-, polymer with 1,2-alkanediamine, alpha-hydro-omega-heteroatom-substituted poly(oxy-1,4-alkanediyl) and 5-heteroatom substituted-1- (heteroatom-substituted alkyl)-1, 3, 3-trialkylcycloalkane.
P-20-0109A	3	04/13/2021	Huntsman Corporation	(S) Exhaust dyeing of cotton and cotton blends.	(G) Acetamide, N-[3-[alkyl(carbonocyclic) substituted]carbomonocycle]-, coupled with diazotized 2- substituted-3-halo-5-nitrobenzonitrile.
P-20-0138A	5	04/16/2021	Gurit (USA), Inc	(S) The substance is part of a mixture with other amines to act as a curative for a 2-part epoxy adhesive formulation but not limited to industries such as marine, automotive and wind energy. The adhesive is "cured" at either ambient conditions or using heat and a chemical reaction occurs forming a solid composite structure.	(G) Alkane diglycidyl ether, polymer with alkyl-cycloalkane diamines.
P-20-0138A	6	04/22/2021	Gurit (USA), Inc	(S) The substance is part of a mixture with other amines to act as a curative for a 2-part epoxy adhesive formulation but not limited to industries such as marine, automotive and wind energy. The adhesive is "cured" at either ambient conditions or using heat and a chemical reaction occurs forming a solid composite structure.	(G) Alkane diglycidyl ether, polymer with alkyl-cycloalkane diamines.
P-20-0174A	6	04/13/2021	P2 Science, Inc	(S) For use in consumer products, as well as direct addition to consumer products. Specific functions would be as solubilizer, rheology modifier and fragrance oil.	(S) 6-Octen-1-ol, 3,7-dimethyl-, homopolymer, monoacetate.
