

materials submitted to the Commission be withheld from public inspection.

Needs and Uses: The Commission will submit the revised information collection to OMB to obtain a full three-year clearance. The changes being made to the information collect concern the Commission's wireless hearing aid compatibility rules as they relate to the obligations of wireless handset manufacturers and wireless service providers to: (1) Label and disclose certain information related to handset packaging; (2) post certain information on their publicly accessible websites; and (3) file annual status reports and certifications. No changes are being made to the information collection as related to standards development and the approved number of estimated respondents and responses.

The revisions to the information collection are necessitated by a Report and Order in WT Docket No. 20–3, FCC 21–28, adopted on February 16, 2021. In this Report and Order, the Commission adopted a new technical standard for determining hearing aid compatibility between hearing aids and wireless handsets and made other corresponding and implementation changes. In addition, the Commission revised the information that handset manufacturers and service providers must include on hearing aid-compatible wireless handset package labels and in the related package inserts or user manuals. The Commission revised the labeling rule in order to streamline the rule and remove outdated requirements. The new rule requires that the package label provide the volume control capabilities of a hearing aid-compatible handset that meets volume control requirements, and it maintains the requirement that a hearing aid-compatible handset's package label state that the handset is hearing aid-compatible. The new rule still requires hearing aid-compatible handsets to list the handset's hearing aid-compatible rating, but moves the location in which it is required to be listed from the package label to the package insert or user manual. The other requirements for package inserts and user manuals have not changed, but the requirements have been reorganized to make them easier to follow. The Commission's labeling revisions continue to allow consumers to access the information that they need to understand the hearing aid compatibility of handsets they are considering for purchase. At the same time, the labeling revisions give handset manufacturers and service providers flexibility in designing package labels and conveying supplemental information.

The Report and Order also revised website posting requirements for handset manufacturers and service providers. The revised rule requires handset manufacturers and service providers to post to their publicly accessible websites the technical standard used to determine hearing aid compatibility in addition to the information that handset manufacturers and service providers are presently required to post. Since handset manufacturers and service providers are already required to include the technical standard used to determine hearing aid compatibility in package inserts or user manuals for hearing aid-compatible handsets, this change will not substantially impact the existing paperwork burden estimates that OMB has already approved for this information collection. Further, the website posting requirement has been revised to eliminate the requirement that service providers post to their publicly accessible websites the different levels of functionality of the hearing aid-compatible handsets that they offer to the public. This change offsets any burden added by the requirement that service providers post the technical standard used to determine hearing aid compatibility.

Finally, the Report and Order addressed the status reporting and certification requirements for handset manufacturers and service providers. The Report and Order revised the dates that service providers must file their FCC Form 855 certifications and handset manufacturers must file their FCC Form 655 status reports. The forms were due January 15 and July 15 each year, respectfully, and now are due by January 31 and July 31. These changes were made to accommodate Federal holidays at the start of January and July and to make sure the forms contain information for the full preceding 12-month periods. The Commission uses these forms as the principal way to ensure compliance with its wireless hearing aid compatibility requirements. The Commission is also revising the forms to reflect the Commission's current hearing aid compatibility *de minimis* provisions and to reflect the Commission's new mailing address.

The changes the Commission is making will not affect the number of respondents or responses, burden hours, or costs presently approved by OMB for this information collection. The Commission requests that OMB approve the proposed revisions to the currently approved information collection in order to implement the changes the Commission adopted in the Report and Order. These changes benefit handset

manufacturers and service providers by reducing regulatory burden while continuing to ensure that the Commission can fulfill its statutory obligation to monitor compliance with its hearing aid compatibility rules and make more complete and accessible information available to consumers. All other paperwork burden requirements previously approved by OMB for this information collection remain unchanged.

Meeting of the Ending 9–1–1 Fee Diversion Now Strike Force; Correction

AGENCY: Federal Communications Commission.

ACTION: Notice; correction.

SUMMARY: The Federal Communications Commission (Commission) published a document in the **Federal Register** of May 20, 2021. The document announced the first meeting of the “Ending 9–1–1 Fee Diversion Now Strike Force” (911 Strike Force) and provided a preliminary agenda for the meeting. This document corrects the document to explain that good cause exists for giving fewer than 15 calendar days' notice for that meeting.

DATES: May 25, 2021.

ADDRESSES: Federal Communications Commission, 45 L Street NE, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: John A. Evanoff, Designated Federal Officer, Federal Communications Commission, Public Safety and Homeland Security Bureau, (202) 418–0848; or Jill Coogan, Deputy Designated Federal Officer, Federal Communications Commission, Public Safety and Homeland Security Bureau, (202) 418–1499; or email: 911StrikeForce@fcc.gov.

SUPPLEMENTARY INFORMATION:

Correction

In the **Federal Register** of May 20, 2021, in FR Doc. 2021–10597, on page 27432, in the third column, correct **SUPPLEMENTARY INFORMATION** by adding the following language to read:

Good cause for late notice: This Notice of public meeting is being published fewer than 15 days before the meeting date of June 3, 2021. This

Notice of public meeting, publishing on May 20, 2021, provides 14 days before the meeting date of June 3, 2021. There is good cause for this late notice. This notice was published late due to extenuating circumstances, including the ongoing COVID-19 pandemic, and the need for additional scheduling arrangements to ensure the ability of all 911 Strike Force members to participate in this initial meeting and to accommodate member and staff schedules. Thus, the FCC was unable to submit the meeting Notice to the OFR in time for the OFR to schedule publication to satisfy the 15-day advance notice requirement without causing significant disruption to 911 Strike Force members and FCC staff.
