

Public Scoping Process

This notice of intent initiates the 45-day scoping process, which guides the development of the draft environmental impact statement/environmental impact report. The scoping process is designed to elicit comments from the public, public agencies, Tribal governments, and other interested parties on the scope of the draft environmental impact statement. All interested parties are encouraged to provide written comments and to participate in upcoming public scoping meetings. The details about upcoming public scoping meetings will be posted on the Tijuana Slough National Wildlife Refuge website at www.fws.gov/refuge/Tijuana_Slough/what_we_do/resource_management.html (click on "TETRP II Phase I"). Requests to be contacted about scheduled scoping opportunities should be submitted via any of the contact methods provided under **ADDRESSES** or **FOR FURTHER INFORMATION CONTACT**, above.

Request for Identification of Potential Alternatives, Information, and Analyses Relevant to the Proposed Action

The Service requests comments concerning the scope of the analysis and identification of relevant information and studies. All interested parties are invited to provide input related to the identification of potential alternatives, information, and analyses relevant to the Proposed Action in writing or during the public scoping meeting. All written comments should be submitted via any of the methods provided under **ADDRESSES**.

Lead and Cooperating Agencies

The Service is the lead agency for the environmental impact statement, and the U.S. Army Corps of Engineers will participate as a cooperating agency. The California Department of Parks and Recreation will serve as the lead State agency for those components of the project that are under the jurisdiction of the State of California.

Decision Maker

The Decision Maker is the Service's Regional Director for the Department of the Interior Region 8.

Nature of Decision To Be Made

The Regional Director, after considering the analysis and information provided in the final environmental impact statement, as well as the comments received throughout the review process, will select the alternative that best achieves the purpose and need for the intended

action. The decision, which will be documented in the record of decision, will also consider the consistency of the action with agency policies, regulations, and applicable laws, and the contribution the action will make towards achieving the purposes for which the Tijuana Slough National Wildlife Refuge was established, while also contributing to the mission and goals of the National Wildlife Refuge System.
