II. Background and Purpose

The Ports and Waterways Safety Act (46 U.S.C. 70003(c)) requires the Coast Guard to conduct a PARS, *i.e.*, a study of potential traffic density and the need for safe access routes for vessels. Through the study process, the Coast Guard coordinates with Federal, State, local, tribal and foreign state agencies (as appropriate) to consider the views of maritime community representatives, environmental groups, and other interested stakeholders. The primary purpose of this coordination is, to the extent practicable, to reconcile the need for safe access routes with other reasonable waterway uses such as construction and operation of renewable energy facilities and other uses of the Atlantic Ocean in the study area.

In 2019, the Coast Guard announced a supplemental study of routes used by all vessels to access ports on the Atlantic Coast of the United States (84 FR 9541, March 15, 2019). This notice announced PARS for specific port approaches and international transit areas along the Atlantic Coast. The purpose of the supplemental studies is to align the Atlantic Coast Port Access Route Study (ACPARS) (81 FR 13307, March 14, 2016) with port approaches. The ACPARS analyzed the Atlantic Coast waters seaward of existing port approaches within the U.S. Exclusive Economic Zone and was finalized in 2017 (82 FR 16510, April 5, 2017).

The purpose of this notice is to announce the draft PARS that examines the approaches to the Chesapeake Bay, VA, in conjunction with the implementation of recommendations of

the ACPARS, and to solicit public comments. We encourage you to participate in the study process by submitting comments in response to this notice. This supplemental PARS used AIS data and information from stakeholders to identify and verify customary navigation routes as well as potential conflicts involving alternative activities, such as wind energy generation and offshore mineral exploitation and exploration in the approaches to the Chesapeake Bay, Virginia.

On November 27, 2019, the Coast Guard published a Notice of Study; request for comments entitled “Port Access Route Study: Approaches to the Chesapeake Bay, Virginia” in the **Federal Register** (84 FR 65398). The public was afforded a 60-day comment period, and the option to request public meetings. The Coast Guard conducted outreach with port partners during this time. The comment period was closed on January 27, 2020.

The study area extends approximately 220 nautical miles seaward of the Chesapeake Bay, between Ocean City, MD, and Cape Hatteras, NC. An illustration showing the study area is available in the docket where indicated under **ADDRESSES**. Additionally, the study area is available for viewing on the Mid-Atlantic Ocean Data Portal at <http://portal.midatlanticocean.org/visualize/>. See the “Maritime” portion of the Data Layers section.

III. Discussion

PARS are the means by which program managers determine the need to establish traffic routing measures or shipping safety fairways to reduce the risk of collision, allision and grounding, and their impact on the environment, increase the efficiency and predictability of vessel traffic, and preserve the paramount right of navigation while continuing to allow for other reasonable waterway uses. The study analyzes current routing measures around the approaches to Chesapeake Bay and proposes an adequate way to manage the forecasted maritime traffic growth, as well as the co-dependent use of the waters in support of future development.
