

CHIP Reauthorization Act of 2015 (MACRA).⁶

Building on recent work of both NCVHS and the Office of the National Coordinator for Health Information Technology (ONC), the Subcommittee is gathering input to inform phase 1 of its two-year project *Standardization of Information for Burden Reduction and Post-Pandemic America*. This work involves assessing the current landscape of standards development and regulatory adoption processes and identifying opportunities for improving coordination of standards development, adoption, implementation, and conformity across disparate health-related data systems. NCVHS may use the information to inform recommendations to HHS. These recommendations may include an updated framework for standards adoption and implementation that takes into consideration public health, wellness, social services, clinical and claims information and newer technologies that promote interoperability across the health care system.

In conjunction with the August 25th listening session, the Subcommittee is including in this notice a Request for Public Comment to obtain written input from any interested stakeholders including: Trading partners and consumers; payers; providers; patients; standards organizations; advocacy groups; data exchanges; health information technology developers; and other data producers and data consumers including long term and post-acute care providers; public health agencies; population health registries; and operators of public and private sector claims and encounter data reporting systems. The Committee has developed specific questions to ensure comments address key issues under consideration by the Committee. Those questions are outlined here and available at: <https://ncvhs.hhs.gov/Request-for-Public-Comment-Standards-Subcommittee-August-Listening-Session>.

(1) How can data sharing be improved between patients, providers, payers, public health system, and other actors in health care? What are the barriers to these improvements?

(2) Are there any new standards or use cases available or under development that should be considered by NCVHS for recommendation to HHS for adoption to support interoperability, burden reduction and administrative

simplification? Some examples might include new information sharing in health care, such as data or semantics for social determinants of health, public health case reporting, or All Payer Claims Databases. Please do not limit responses to these examples.

(3) How have other industries effectively implemented, tested, and certified standards for data and their exchange that could be considered for health care?

(4) What short term, mid-term and long-term opportunities or solutions do you believe should be priorities for HHS?

Please submit comments to NCVHSmal@cdc.gov by close of business Friday, July 30, 2021.

The Subcommittee will consider information from the invited panelists as well as all timely submitted written comments from the public in its development of a landscape assessment and potential recommendations.

There will be a public comment period. The meeting times and topics are subject to change. Please refer to the NCVHS website posted agenda for any updates.

Contact Person for More Information: Substantive program information may be obtained from Rebecca Hines, MHS, Executive Secretary, NCVHS, National Center for Health Statistics, Centers for Disease Control and Prevention, 3311 Toledo Road, Hyattsville, Maryland 20782, telephone (301) 458-4715, email NCVHSmal@cdc.gov. Summaries of meetings and a roster of Committee members are available on the home page of the NCVHS website <https://ncvhs.hhs.gov/>. Further information, including an agenda and instructions to access the broadcast of the meeting, will be posted as soon as the information is available.

Information reported to the Federal departments and agencies under the Common Rule with respect to a satisfactory assurance is used to ensure that an institution engaged in non-exempt research involving human subjects conducted or supported by a

Common Rule department or agency has (1) established adequate administrative policies and procedures for protecting the rights and welfare of human subjects in research, and (2) accepts that responsibility. Other reporting requirements are used to: Assess whether the institution is following the established procedures; ensure that Federal funds are not expended for

unapproved human subjects research; and, determine if the approved status of an awarded grant, contract, or cooperative agreement should be reviewed, with the ultimate goal of maintaining or increasing human subject protections.

Likely Respondents: Institutions, institutional review boards and investigators.
