Abstract: The scope of this ICR is the electronic reporting components of CROMERR, which is designed to: (i) Allow EPA to comply with the Government Paperwork Elimination Act of 1998; (ii) provide a uniform, technology-neutral framework for electronic reporting across all EPA programs; (iii) allow EPA programs to offer electronic reporting as they become ready for CROMERR; and (iv) provide states with a streamlined process—together with a uniform set of standards—for approval of their electronic reporting provisions for all their EPA-authorized programs. Responses to the collection of information are voluntary. In order to accommodate CBI, the information collected must be in accordance with the confidentiality regulations set forth in 40 CFR part 2, subpart B. Additionally, EPA will ensure that the information collection procedures comply with the Privacy Act of 1974 and the OMB Circular 108.

Form Numbers: None.

Respondents/affected entities: Entities that report electronically to EPA and state, tribal, or local government authorized programs; and state, tribal, and local government authorized programs implementing electronic reporting.

Respondent's obligation to respond: Voluntary, required to obtain or retain a benefit (Cross-Media Electronic Reporting Rule (CROMERR) established to ensure compliance with the Government Paperwork Elimination Act (GPEA)).

Estimated number of respondents: 132,724 (total).

Frequency of response: On occasion.

Total estimated burden: 81,985 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$4,710,366 (per year), including \$3,620,310 in annualized labor costs and \$1,090,056 in annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 4,569 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. The decrease in respondent burden can be attributed primarily to two reasons. First, over the past three years, the Agency made improvements to CDX to enhance efficiencies in end-user registration, integration, and Help Desk support. These improvements resulted in reduced burden to respondents. Second, through technological improvements, the Agency now is able to obtain real world data via Google Analytics on the frequency and amount of time a respondent spends accessing CDX web pages and features. Based on this information, EPA has revised the burden estimates associated with some of the CDX registration and identity proofing activities. The Agency believes that these revised burden estimates more accurately reflect the resources spent by respondents conducting electronic reporting activities under CROMERR. Note that the decrease in respondent burden described above was offset by an almost two-fold increase in the number of respondents that report to state, tribal, and local electronic document receiving systems. In developing this ICR, EPA revised the approach used to estimate the number of these reporters. The revised approach uses shared CROMERR services solution data to supplement estimates obtained based on analysis of respondent universe growth rates in EPA program ICRs, which was the previous approach used to estimate number of reporters. The overall change in respondent burden is considered an “adjustment,” because it results from changes in the respondent universe and hourly burden estimates used in the development of the ICR.

Director, Regulatory Support Division.

Abstract: WaterSense is a voluntary program designed to promote use of water-efficient products and services via a common label. The label provides an incentive for manufacturers and builders to design, produce, and market water-efficient products and homes. Data collected under this ICR will assist WaterSense in demonstrating results and carrying out evaluation efforts to ensure continual program improvement. Shipment and sales data submitted by WaterSense manufacturer and retailer/distributor partners are collected as confidential business information (CBI) using the procedures outlined in the WaterSense CBI security plan under the Clean Water Act.

As a terms of clearance for the previous ICR, EPA was required to address comments on an April 2020 **Federal Register** notice (85 FR 20268) that sought input on whether and how the program could better understand and collect information on consumer satisfaction with labeled products. As summarized in the supporting statement, there was no support for conducting a survey or study on consumer satisfaction for use in future product reviews. There was, however, support for a general survey to provide information to improve awareness of the WaterSense label, which is covered under this ICR.
