

authority and meet the definition of "state" under the SDWA.

Respondent's obligation to respond: Mandatory Section 1414(c)(3)(A) of SDWA.

Estimated number of respondents: 55 (total).

Frequency of response: Annually.

Total estimated burden: 4,400 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$530,000 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in estimates: There is no change of hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Second, the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs.

Director, Regulatory Support Division.

SUPPLEMENTARY INFORMATION: EPA is creating the Public Health Emergency Workplace Response System, EPA-89, to support the Agency's ability to provide a safe and healthy working environment in EPA locations (i.e., locations where the Agency is conducting official business) during a public health emergency (e.g., a Presidential declaration of a national public health emergency, U.S. Department of Health and Human Services declaration of a public health

emergency, or other circumstances constituting a public health emergency). EPA-89 will allow the Agency to develop and institute safety measures in response to public health emergency contaminants (e.g., a pathogen or chemical) as needed, which may include:

- Contact Tracing—identification, monitoring, and support of an affected individual (an individual in an EPA location with confirmed or probable exposure to a public health emergency contaminant), and identification and contact of a potentially affected individual (an individual who was in contact with an affected individual or exposed to a public health emergency contaminant while in an EPA location);
- Medical Screening—examination of individuals entering an EPA location for symptoms or other indications consistent with exposure to a public health emergency contaminant; and
- Workplace Access Tracking and Planning—planning and tracking of location and time of individuals in EPA locations for purposes of contact tracing, social distancing, and/or management of exposure to public health emergency contaminants within EPA locations.

SYSTEM NAME AND NUMBER:

Public Health Emergency Workplace Response System, EPA-89.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Records are maintained at the EPA Headquarters, 1301 Constitution Ave. NW, Washington, DC 20460, regional offices, field offices and laboratories.

SYSTEM MANAGER(S):

PURPOSE(S) OF THE SYSTEM:

EPA proposes to establish a new system of records to manage the Agency's planning and response to a

public health emergency in EPA locations. EPA intends to collect information in the system to assist EPA with maintaining safe and healthy workplaces, to protect individuals in EPA locations from risks associated with a public health emergency, to plan and respond to workplace and personnel flexibilities needed during a public health emergency, to facilitate EPA's cooperation with public health authorities, and assist with contact tracing. Contact tracing is defined as the identification, monitoring, and support of an affected individual (an individual in an EPA location with confirmed or probable exposure to a public health emergency contaminant), and identification and contact of a potentially affected individual (an individual who was in contact with an affected individual or exposed to a public health emergency contaminant while in an EPA location).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Categories of individuals covered by this system include EPA employees. The system also covers individuals working in EPA facilities or on official EPA business, including: EPA contractors, non-EPA government personnel or contractors, interns, grantees, fellows, and volunteers. Other categories of individuals covered by the system include: Visitors to EPA facilities; and potentially affected individuals at EPA locations or otherwise present during official EPA business. The system also covers individuals listed as emergency contacts for such individuals.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information collected in the system may include but is not limited to: Contact information of the individuals (which may include name, address; phone number; email address); EPA LAN ID; EPA employee number; EPA staff office (*e.g.*, organization chart structure) and supervisor contact information (which may include name, phone number, and email address); emergency contact information (which may include name, phone number, and email address); and Agency facility or location access information that includes, but is not limited to, the dates when the affected individual visited the facility or location, the areas that they visited within the facility (*e.g.*, entrance used, office and cubicle number, shared spaces used) or at the location, the duration of time spent in the facility or location, the individuals they came in contact with, and security systems monitoring data; and facility cleaning

data. The system also collects Sensitive Personal Identifiable Information (SPII) such as medical information, including but not limited to, dates and results of any: Expected or confirmed medical testing (*e.g.*, temperature readings, viral or bacterial exposure testing, antibody testing) performed in relation to a public health emergency; symptoms consistent with a public health emergency; potential or actual exposure to a public health emergency contaminant; immunizations and vaccination information; or other medical history related to the treatment of a public health emergency contaminant. The system may also collect information, including but not limited to, on: Recent travel details (including dates, locations, carriers); EPA staff certifications relating to dependent care obligations or whether EPA staff are in a high-risk category regarding a public health emergency contaminant; name and contact information of EPA staff assigned to track and respond to an individual's case; date and time of information entry; contents of communications between assigned EPA staff and affected individuals; and case status.

RECORD SOURCE CATEGORIES:

The information in this system is collected from the individual, the individual's manager, and from the individual's emergency contact. When necessary, for non-EPA personnel, information may also be collected from the individual's employer, grantee organization, other federal agencies, or similar designated external points of contact. Information is also collected from security systems monitoring access to Agency facilities (such as video surveillance and key card logs), human resources systems, emergency notification systems, and federal, state, and local agencies assisting with the response to a public health emergency.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

These records are maintained electronically on computer storage devices such as computer tapes and disks, or on paper. The computer storage devices are managed by the EPA, Office of Mission Support, 1301 Constitution Ave. NW, Washington, DC 20460. Backup files will be maintained at a disaster recovery site. Computer records are maintained in a secure password-protected environment. Access to computer records is limited to those who have a need to know. Permission level assignments will allow users access only to those functions for which they are authorized. All records are maintained in secure, access-controlled areas or buildings.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records may be retrieved by any data category in the system (e.g., name, office, supervisor, date of medical testing, assigned EPA staff). Records are only retrievable by authorized EPA staff (who are EPA employees and/or contractors) and retrieval methods are limited by permission levels as described below under *Technical Safeguards*.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

EPA will retain and dispose of these records in accordance with the National Archives and Records Administration General Records Schedule. EPA-89 follows the EPA Records Policy for retention and disposal, per schedule 1012 (Information and Technology Management) and schedule 1049 (Information Access and Protection Records). The schedule provides disposal authorization for electronic files and hard copy printouts created to monitor system usage, including log-in files, audit trail files, and system usage files. Records in EPA-89 will be deleted or destroyed when the Agency determines they are no longer needed for administrative, legal, audit, or other purposes.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Security controls used to protect PII and SPII in EPA-89 are commensurate with those required for an information

system rated moderate for confidentiality, integrity, and availability, as prescribed in NIST Special Publication, 800-53, "Recommended Security Controls for Federal Information Systems," Revision 4.

Administrative Safeguards.

EPA staff must complete annual agency training for Information Security and Privacy. EPA instructs staff to lock and secure their computers when unattended.

Technical Safeguards.

The system administrator, an EPA staff member, authorizes appropriate permission levels for authorized EPA staff. Permission level assignments allow authorized users to access only those system functions and records specific to their Agency work need. EPA also has technical security measures including restrictions on computer access to authorized individuals and required use of a personal identity verification (PIV) card and password.

Physical Safeguards.

EPA equipment used for EPA-89 is located in the Federal cloud space not connected to other federal systems. Only authorized employees have access to this information in the Federal space.

RECORD ACCESS PROCEDURES:

Individuals seeking access to information in this system of records about themselves are required to provide adequate identification (*e.g.*, driver's license, military identification card, employee badge or identification card). Additional identity verification procedures may be required, as warranted. Requests must meet the requirements of EPA regulations that implement the Privacy Act of 1974, at 40 CFR part 16.

CONTESTING RECORDS PROCEDURES:

Requests for correction or amendment must identify the record to be changed and the corrective action sought. Complete EPA Privacy Act procedures are described in EPA's Privacy Act regulations at 40 CFR part 16.

NOTIFICATION PROCEDURES:

Any individual who wishes to know whether this system of records contains a record about themselves, and to obtain a copy of any such record(s), should make a written request to the Attn: Agency Privacy Officer, MC 2831T, 1200 Pennsylvania Ave. NW, Washington, DC 20460, privacy@epa.gov.
