burden analysis correctly and appropriately accounts for the burden on regulated entities of collecting and maintaining applicant flow data under UGESP.

Burden Statement: There are no reporting requirements associated with UGESP. The burden being estimated is the cost of collecting and storing a job applicant's gender, race, and ethnicity data.

The only paperwork burden derives from this recordkeeping. Only employers covered under Title VII and Executive Order 11246 are subject to UGESP. However, for the purposes of burden calculation, data for all employers are counted.<sup>2</sup> The number of employers with 15 or more employees is estimated at 957,005 which combines estimates from private employment,<sup>3</sup> the public sector,<sup>4</sup> and referral unions.<sup>5</sup> Employers with 15 or more employees represent approximately 15.3% of all employers in the U.S. and employ about 87.7% of all employees in the U.S.<sup>6</sup>

This burden assessment is based on an estimate of the number of job applications submitted to all employers in one year, including paper-based and electronic applications. The total number of job applications submitted every year to covered employers is estimated to be 1,989,375,182, based on an average of approximately 29 applications <sup>7</sup> for every hire and a Bureau of Labor Statistics data estimate of 68,594,000 annual hires.<sup>8</sup> This figure

<sup>7</sup> The average number of applications received per job opening in 2018, according to the private career advice website Zety. (*https://zety.com/blog/hr-statistics*).

<sup>8</sup> Bureau of Labor Statistics Job Openings and Labor Turnover Survey, 2018 annual level data (Not seasonally adjusted), (*http://www.bls.gov/jlt/*  also includes 149,182 applicants for union membership reported on the EEO–3 form for 2018.

The employer burden associated with collecting and storing applicant demographic data is based on the following assumptions: Applicants would need to be asked to provide three pieces of information—sex, race/ ethnicity, and an identification number (a total of approximately 13 keystrokes); the employer may need to transfer information received to a database either manually or electronically (although we believe it likely that many employers utilize HR software that handles employment applications as well as the rest of the employers HR needs); and the employer would need to store the 13 characters of information for each applicant. Recordkeeping costs and burden are assumed to be the time cost associated with entering 13 keystrokes.

Assuming that the required recordkeeping takes 30 seconds per record, and assuming a total of 1,989,375,182 paper and electronic applications per year (as calculated above), the resulting UGESP burden hours would be16,578,127. Based on a wage rate of \$17.44 9 per hour for the individuals entering the data, the collection and storage of applicant demographic data would come to approximately \$289,122,526 per year. We expect that the foregoing assumptions are over-inclusive, because many employers have electronic job application processes that should be able to capture applicant flow data automatically.

While the burden hours and costs for the UGESP recordkeeping requirement seem very large, the average burden per employer is relatively small. We estimate that UGESP applies to 957,005 employers, which is about 15.3% of all employers in the U.S, and who employ about 87.7% of all employees in the U.S (86.5% of private employees and 95.9% of government employees) <sup>10</sup>. Therefore, the estimated cost per covered employer is about \$263.<sup>11</sup> Additionally, 35.0% of employees work for firms with at least 5,000 employees,<sup>12</sup> and it is likely the burden of entry for these firms is transferred to the applicants via use of electronic application systems. UGESP also allows for simplified recordkeeping for employers with more than 15 but less than 100 employees.<sup>13</sup>

For the Commission.

In order to minimize recordkeeping burdens on employers who employ one hundred (100) or fewer employees, and other users not required to file EEO-1, et seq., reports, such users may satisfy the requirements of this section 15 if they maintain and have available records showing, for each year: (a) The number of persons hired, promoted, and terminated for each job, by sex, and where appropriate by race and national origin; (b)The number of applicants for hire and promotion by sex and where appropriate by race and national origin; and (c) The selection procedures utilized (either standardized or not standardized).

In 2018, 64,286,000 new hires were in the private sector 86.5% of which would be 55,575,000 new hires estimated for firms with at least 15 employees. Similarly, 4,310,000 new hires were in the public sector. 95.9% of which would be 4,133,000 new hires into governments with at least 15 employees. This totals approximately 59,708,000 new hires in Title VII locations. The remainder of the burden hour calculations remain the same.
