SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for revision of a current information collection. Under the Magnuson-Stevens Fishery Conservation and Management Act, the Secretary of Commerce has the responsibility for the conservation and management of marine fishery resources. Much of this responsibility has been delegated to NOAA's National Marine Fisheries Service (NMFS).

Under this stewardship role, the Secretary was given certain regulatory authorities to ensure the most beneficial uses of these resources. One of the regulatory steps taken to carry out the conservation and management objectives is to collect information from users of the resources.

The Secretary has enacted rules to issue permits to individuals and organizations participating in federally controlled fisheries. Permits are necessary to: (1) Register fishermen, fishing vessels, fish dealers and processors; (2) list the characteristics of fishing vessels and/or dealer/processor operations; (3) exercise influence over compliance (e.g., withhold issuance pending collection of unpaid penalties); (4) maintain contact lists for the dissemination of important information to the industry; (5) register participants to be considered for limited entry; and (6) provide a universe for data collection samples. Identification of fishery participants, their gear types, vessels, and expected activity levels is an effective and necessary tool in the enforcement of fishery regulations.

This collection is being revised to introduce a new online permitting system (FishOnline) to allow individuals and organizations to apply and renew their fishing vessel permits, operator permits, dealer permits, Letter

of Authorization (LOA), and gillnet certificates.

This collection also includes the requirement for participants in certain fisheries to use onboard vessel monitoring systems (VMS) and to notify NMFS before fishing trips for the purpose of observer placement. Other permitting in this collection includes the written request to participate in any of the various exemption programs offered in the Greater Atlantic region.

Exemption programs may allow a vessel to fish in an area that is limited to vessels of a particular size, using a certain gear type, or fishing for a particular species. This collection also contains paperwork required for vessel owners to request gillnet and lobster trap tags through the Greater Atlantic region permit office.

Lastly, vessel owners that own multiple vessels, but would like to request communication from NMFS be consolidated into one mailing (and not separate mailings for each vessel), may request the single letter vessel owner option to improve efficiency of their business practice.

II. Method of Collection

Vessel Permits: All vessel permit applications, including permit applications and renewals for vessels, dealers, and vessel operators, as well as gillnet and lobster trap tag purchase, are required to be submitted using an online account (FishOnline).

VMS Requirements: Vessels with VMS requirements are required to declare their intent to fish (e.g., declare into the fishery) and submit daily catch reports using electronic VMS units on board the vessel. Other VMS actions may include trip start and end hails, pre-landing notifications, and days-at-sea (DAS) adjustments. VMS power down exemption requests are submitted by signed paper form.

Observer Program Call-in Requirements: Vessels issued certain permits such as Northeast multispecies, monkfish, scallop, and Atlantic herring permits are required to give advance notification to the Northeast Fisheries Observer Program (NEFOP) before the start of a trip in order to receive a fisheries observer or a waiver. Vessels use an online pre-trip notification system, email, toll-free call-in number, or a local phone number to comply with this requirement.

Exempted Fisheries Programs: Vessels that would like to request participation in one or more of the Greater Atlantic region fisheries exemption programs must either submit a request electronically using their VMS unit, by declaring into an exempted fishery prior

to the start of a trip, or by submitting a request to participate in the program(s) of interest using their FishOnline account.

Vessel Owner Single Letter Option: Vessel owners that own multiple vessels, but would like to receive only a single Greater Atlantic Fisheries Bulletin or small entity compliance guide instead of one for each vessel permit, must submit a written request to NMFS to participate in this program.
