The patent rights in these inventions have been assigned and/or exclusively licensed to the government of the United States of America.

The prospective exclusive license territory may be worldwide, and the field of use may be limited to: "Development and commercialization of RP2 AAV-based gene human therapy for any ocular disease, disorder or condition, including human X-linked retinitis pigmentosa (XLRP)".

This technology discloses Adeno-Associated Viral (AAV) vectors comprising nucleotide sequences encoding RP2 or RPGR- ORF 15 transgenes and their use in treating or preventing X-linked forms of retinitis pigmentosa (XLRP).

This notice is made in accordance with 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive license will be royalty bearing, and the prospective exclusive license may be granted unless within fifteen (15) days from the date of this published notice, the National Cancer Institute receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

In response to this Notice, the public may file comments or objections. Comments and objections, other than those in the form of a license

application, will not be treated confidentially, and may be made publicly available.

License applications submitted in response to this Notice will be presumed to contain business confidential information and any release of information in these license applications will be made only as required and upon a request under the Freedom of Information Act, 5 U.S.C. 552.

Dated: July 2, 2021.
