II. Background

Under 49 U.S.C. 31136(e) and 31315(b), FMCSA may grant an exemption from the FMCSRs for no longer than a 5-year period if it finds such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption. The statute also allows the Agency to renew exemptions at the end of the 5-year period. FMCSA grants medical exemptions from the FMCSRs for a 2-year period to align with the maximum duration of a driver’s medical certification.

The three individuals listed in this notice have requested an exemption

from 49 CFR 391.41(b)(4). Accordingly, the Agency will evaluate the qualifications of each applicant to determine whether granting the exemption will achieve the required level of safety mandated by statute.

The physical qualification standard found in § 391.41(b)(4) states that a person is physically qualified to drive a CMV if that person has no current clinical diagnosis of myocardial infarction, angina pectoris, coronary insufficiency, thrombosis, or any other cardiovascular disease of a variety known to be accompanied by syncope, dyspnea, collapse, or congestive cardiac failure.

In addition to the regulations, FMCSA has published advisory criteria¹ to assist medical examiners in determining whether drivers with certain medical conditions are qualified to operate a CMV in interstate commerce. The advisory criteria states that ICDs are disqualifying due to risk of syncope.

III. Qualifications of Applicants

Willard Drysdale

Mr. Drysdale is a CMV driver in Minnesota. An October 7, 2020, letter from his cardiologist reports that in 2018, his pacemaker was upgraded to an ICD for preventive measures, that he was asymptomatic concerning his cardiac history at his last evaluation in 2019, and that he has not required any device therapies for tachycardia.

William Edwards

Mr. Edwards is a CMV driver in New York State. A March 31, 2021, letter from his cardiac specialists reports that he is being treated with a biventricular ICD that was implanted in March 2020, and the device has never needed to deliver therapy.

Francisco Garcia

Mr. Garcia is a CMV driver in New Jersey. A March 4, 2021, letter from his cardiologist reports that his ICD was implanted for preventive measures, he has never had a sustained arrhythmia, and he has never passed out. His physician and the electrophysiologist who implanted his defibrillator both agree that it would be safe for Mr. Garcia to drive a CMV.

IV. Request for Comments

In accordance with 49 U.S.C. 31136(e) and 31315(b), FMCSA requests public

¹ These criteria may be found in 49 CFR part 391, APPENDIX A TO PART 391—MEDICAL ADVISORY CRITERIA, section D. *Cardiovascular: § 391.41(b)(4)*, paragraph 4, which is available on the internet at <https://www.gpo.gov/fdsys/pkg/CFR-2015-title49-vol15/pdf/CFR-2015-title49-vol15-part391-appA.pdf>.

comment from all interested persons on the exemption petitions described in this notice. We will consider all comments received before the close of business on the closing date indicated under the **DATES** section of the notice.

Larry W. Minor,

Associate Administrator for Policy.
